- Glazing in hazardous locations
- Materials
- Structural design
- Roofs or canopies over pools and spas
- Show floor slopes, wall angles, pool shape, water depth, and waterline
- Pool surface area, deck areas and dimensions

Suction Entrapment Avoidance (310)

- Provided in accordance with APSP 7 (provide circulation design form).

Lighting (321)

- Pool and deck illumination

Ladders (322)

- Location and wall clearances

Safety (323)

- Handholds where depth is greater than 42" and less than 12" above waterline
- Any other obstructions, protrusions or entrapments

IN-GROUND SWIMMING POOLS (Chapter 8)

New, Modification or Repair

- Construction tolerances
- Diving water envelopes per the applicable ISPSC
- Walls, offset ledges and pool floors

Manufactured and Fabricated Diving Equipment (808)

- Other features outside of minimum diving zone
- Location, Elevation and minimum water envelope
- Platform or diving equipment height above waterline

Special Features (809)

- Slides
- Entry and exit and secondary entries and exits (over 30' in width)
- Beach or Step and sloping entries
- Other Architectural features horizontal slope
- Underwater benches, seats or swim outs below design waterline

Rope and Float (811)

- Location and anchoring

PERMANENT SPAS AND PERMANENT EXERCISE SPAS

Structure and Design (503)

- Water depth
- Seating
- Floor slope

PORTABLE SPAS AND PORTABLE EXERCISE SPAS (1001)

- Manufacturer's installation instructions
- Instructions/User's Guide and safety signs

PLUMBING

Circulation Systems

- System design
- Draining, backwashing and winterizing method
- Pool filling method (backflow protection)
