THE MEMORY OF A CHILD

How many of us ever stop to consider that a child forms lasting impressions from the little things of life, and its associations with its elders?
How many of us cause to reflect that the infantile brain is constantly reaching out for that knowledge which is to make or mar its future?

THE REWARD OF COURTESY

From little sprouts big trees will often grow.
We tremble upon the sprouts of today and gaze with admiration upon the giants that were sprouts of a former generation.

TOO MUCH DYNAMITE

It has been suggested by some warped and twisted genius that the president appoint a commission of eminent American statesmen to submit proposals of peace to the warring kings of Europe, that commission to be composed of Theodore Roosevelt, William Jennings Bryan and William Howard Taft.

PARAGRAPHS

Why is war?
'Made in America' is better.
Have you bought your Separator?
Breezy minds are never becalmed.

'Bought at home and used at home' is also good.
Cider apples will be in demand on November 1st, 1914.
A tax on soft drinks might drive some people to hard cider.

The turning movement of tradition, we believe, was executed by the worm.

Men exhibit battle wounds and call it glory. If the cow kicks them they cuss.

Gold is the only circulating medium in Europe, but it isn't doing much circulating.

Having traveled the circuit, war is now being blamed upon the heroes of literature.

A young about town wants to know how he can improve his physique. Woodpile.

'What the ding-ding,' commented several prominent Virginia editors yesterday morning.

'Peace is in sight,' says a local prognosticator. Of course. We can see a long ways these days.

Fill your lungs with air and your brain with knowledge and your pockets will fill themselves.

When the mighty lead the little fellows toddle along behind. But we often feel lonesome in front.

They argue that a man without enemies is no good. Then why not have a few? They are easy to get.

The place that Gen. Sherman made famous will have to hustle if it keeps pace with that European war.

To the President: 'Buy a bale of cotton' is good. A dollar a year for this paper is also good—very good.

Ninety-nine percent of our people want peace and disarmament. The other one per cent has to do the fighting.

Want to know what women's gowns are to look like this season? Go out in the cornfield and gaze upon a scarecrow.

'French Turcos charge like hell let loose,' says a foreign dispatch. Perhaps. Can't say. Never been to hell.

Drunkenness is a lingering disease. It reaches the incurable stage after it has paralyzed the victim's self-respect.

A Chicago paper says South America is sending up a cry for machinery. Good. Do more shipping and less gabbing.

If you have nothing else to do for the next sixty days, just sit down and try digging the truth out of this blasted war.

The war is costing England at the rate of \$44,500 a second, which is slightly in excess of the cost of running a country newspaper.

Mr. Carnegie's plans seem to have worked backward. He should have given Europe the Librarians and America the Peace Palace.

Doc says that under the present high cost of living it is foolish for any family in no more than modern circumstances to try to keep a tapeworm.

'Alcohol is a food and not a poison,' says a headline in a booze promulgating publication. Why not add that it is clothes and shoes for the children.

A French scientist has predicted the greatest drouth the world has ever known from 1915 to 1935. It will begin in Virginia November 1st, 1916.

If the government wants more revenue to keep the wolf from the star spangled door step, we suggest a tax on politicians.

'T would be some wad.

A Chicago judge must read one million pages of proofs, arguments, briefs, etc., before he can give a decision in a case now before him. And a decision must be handed down before death overtakes him.

YOUR BLOOD
Is the canal of life but it becomes a sewer if clogged up. All life consists of building up and tearing down and just in the same manner that the blood carries to the various parts of the body the food that the cells need for building up, so it is compelled to carry away the waste material that's torn down.

DR. PIERCE'S Golden Medical Discovery
Is the balancing power—a vitalizing power. It acts on the stomach and organs of digestion and nutrition—on the purifying filters which clean the blood.

In a hard-fought and exciting contest at Marshall yesterday the Manassas High School football squad went down to defeat before the strong Randolph-Macon Academy aggregation of Front Royal, by a score of 18 to 0.
