Hammond Feed

Wherever Hammond Feed has been sold for any length of time, 90 per cent of the largest and best dairy farms are using it.

Why is this?

Because they get more and better milk for less money. Dealers do not buy this feed from the manufacturers to please them—neither do the farmers and dairymen buy it from the dealers to please the dealers.

Why is this?

It is because it results in profitable sales. You can take a sack of chaff and add a shovel of cotton seed meal and have the per cent of protein, but you would have a great balanced ration, wouldn’t you?

A Pioneering Missionary Pours the Last Service Given by His Sufferings.

Washington By Telegraph

J. B. Jonston, Special Correspondent.

A Pioneering Missionary Pours the Last Service Given by His Sufferings.

Soldiers and Officials Who Were with the Missionary on the Mission to Abyssinia Are Lamenting the Loss of a Great Pioneer.

WASHINGTON

In the garden of the United States Capitol, on the south side of the House of Representatives, there stands a headstone set in the ground. It is the monument of a pioneer who, for many years, was a leader in the work of the United States. His name is unknown to many, but his work is remembered by all.

The monument is a large stone slab, about six feet high and three feet wide. On it are inscribed the words, "Here lies a great pioneer, whose name is unknown to many, but whose work is remembered by all."

The garden is filled with other monuments, each representing a pioneer who has made a great contribution to the country. But this one is unique. It is the only monument that has been raised to a pioneer whose name is unknown.

For many years, this pioneer worked tirelessly to improve the lives of the people. He was a leader in the movement to make the country better. His work was recognized by all, and he was honored with many awards.

But his name is unknown to many. The monument was erected by a group of friends who wanted to honor him in a special way.

They chose a headstone, which is the most traditional form of monument. It is simple and effective, and it says everything that needs to be said.

The garden is a place of great respect. It is a place where people come to remember and to pay homage to the pioneers who have made the country what it is today.

One can only imagine the impact this pioneer had on the country. He was a true leader, and his work will be remembered for generations to come.

READ CAREFULLY

Company is delaying the building of any new wells until it has an adequate supply of water. It believes that the present drought is not permanent, and that the water situation will improve as the season advances. The company has decided to proceed with its plans for the development of the Oil Shale field, which it believes to be one of the most promising in the country. It expects to begin production early next year, and anticipates a substantial increase in output during the current fiscal year.

ONEL-MAN POWER

THE MORGANIZATION OF THE UNITED STATES

There is Now a One-Man Power Mill. Engaging 135,000 Industrial and Transportation Companies, Businessmen of Innumerable Capital, According to More Than

New York City, April 22

While the American public has heard of the existence of this mine, and has been alerted to its operations, the actual workings of the mine have been kept secret. The mine, located in a remote part of the United States, has been in operation for several years, but has not been widely known. The mine is operated by a single man, who has managed to keep the operation secret from all but a select few.

The mine is one of the largest in the world, and is equipped with state-of-the-art technology. The man in charge, John Doe, has managed to keep the mine running efficiently, and has managed to keep all of the employees happy.

The mine produces a variety of minerals, including gold, silver, copper, and iron. The minerals are extracted using the latest in mining technology, and are then processed at the mine site. The processed minerals are then transported to various locations around the world, where they are used in a variety of industries.

The man in charge, John Doe, has managed to keep the operation secret from all but a select few. He has managed to keep the employees happy, and has managed to keep the mine running efficiently.

The Lure of the Mask

By HAROLD MAC GRATH

SYNOPSIS

Jack Onalan, a newspaper editor, was fascinated by the story of the mysterious club. He had heard of a club called "The Lure of the Mask," and was determined to uncover its secrets. He persuaded Kitty, a singer, to join him on his quest.

Chapter 1

The fascination of Monte Carlo.

Chapter 2

An interview with Jack Onalan.

Chapter 3

The strange case of the masked man.

Chapter 4

The exploit of Kitty and Jack Onalan.

Chapter 5

The end.
The Manassas Democrat.

GARRISON & S.ARUGLAND

ED. AND PROP.

THE MANASSAS DEMOCRAT.

MANASSAS, VA., THURSDAY, FEBRUARY 11, 1926.

Forward

Manassas is entering the greatest era of progress and prosperity in the history of the town. Never before has the future appeared brighter, and there has been more evidence of actual development at hand. Within the last few weeks, Manassas, through instrumentality of the Business League, has taken a new lease on life. New and better and lighter facilities virtually have been assured and prospects are bright that another railroad will be secured.

As a result of a conference in Richmond last Thursday between a committee of the Business League and M. W. Anderson, general counsel of the Odd Fellows, the electric railroad proportion has taken a new aspect. The committee was assured that in the event all conditions were equal that Manassas will be on the route of the electric line from Richmond through Ashland in Manassas. The grades would be easier and fewer bridges would be required. Then, too, the interference of traffic from the Manassas branch of the Southern is a factor to be considered.

The value to Manassas of this electric railroad proportion is beyond calculation. The commerce of a wide field now without transportation facility will be developed by the electric railroad, and the area described is a feasible extension.

Manassas is making rapid strides forward. It is known as the best city in the state—the town composed of citizens who do what is right.

Japanese Exclusion

Battleship with Japan have been strained by the Japanese at the recent session of the Congress. The Japanese declare that they are tired of the anti-Japanese feeling in America and through the press of other countries are demanding political and social disengagement with the United States. Japan's world policy presents a most serious political problem. No other such country, sooner or later, will be able to control this nation. A settlement of this kind would be much to be gained by altering the anti-Japanese feeling in American citizenship.

China's future in the aspect of the world is to be characterized by a growth of statesmanship or statesmanship, but in the event that there is a violation of the conditions of the treaty, China is not to be treated as an equal partner.

CHICAGO switchmen and the railroad union adopted a scale and more effective method of securing their rights through arbitration.

Cabinet talk at an interview in Chicago that he will not yet be ready forması. One of his provisions in Chicago indicates that the travel is under a more careful regulation.

The price of meat at the packing centers now near the place where it is located is about $1.40 per pound. Some persons have passed a lot of revenue.

The state is in some cases to Manassas. Two out of three automobiles in one consignment are coming soon.

Government of Congress do not seem especially anxious over the amendment of Reconstruction.

The cost of living at St. Valentine's day had something to be said for itself.

RICHMOND is said to be passing through a real moral crisis. Goodwill... Spring pets are beginning to sprout.

SMALL BLAZE MUCH EXCITEMENT

The Farmers' Institute held at Ruffin's School building tomorrow morning at 9 o'clock, and every present is to be attended. The program includes, among other things, a discussion of the methods of marketing the wool.

The institute has been fortunate in being able to secure noted experts in the Department of Agriculture and the program consists of such men as Mr. Bond, who is noted for his practical knowledge of dairy farming. The program will be of interest to all who are connected with the dairy industry.
