The Manassas Democrat,

FRANK E. GARRISON, Manager

MANASSAS, VA., THURSDAY, SEPT. 5, 1912.

THE VOICE OF A STATESMAN

A statesman is a statebuilder; one having wisdom in statecraft and not one who is a politician only for the loaves and fishes. candidate for vice-president, Governor Marshall, in his campaigning statesman, really a statesman. Listen to what he said: He prophe sied "a peaceable or forcible revolution in the conduct of affairs." He said. "the people will not permit a few to make peace or war, famine or plenty. Such conduct is breeding Societalists like rabbits in a warren." He is right: the present regime of Republican rule distated by Guggenfeller, Morganhein & Co. through their representatives in Congress has been the most fruitful cause of the rapid increase in the Socialist vote and influence. Were it possible for Wall street to dictate the election of the next president and control the actions of the next Congress the Socialist vote of next November would double by 1916. If we do not soon have relief quite propressive in appearance, but not in a Rooseveltian sen from the high tariff barons and other forms of privilege the Socialists will be asked to steer our ship of state. The next administra- does not necessarily make all of the name immune from trouble tion, peaceable or forcible; peeaceable we hope by a Democratic woman suffrage. But they will come again through the initiative administration.

Hear Governor Marshall again: "How reach the question of IN Messrs. Stuart and Tucker Virginia will have two candidates lawyer who counsels, aids, abets or advises the formation of a trust has made its appearance. This number is of especial interest to criminally liable. What right has he, because he is a lawyer, to Confederate Veterans lic? He should be held responsible. He would not buy a jimmy for a prospective burglar yet he knows, if he will but stop to think that many a contract which he draws is more burglarious than a immy. If he will not quit make him particeps criminis." Strange make the deadly cobra harmless is to pull its teeth.

THE PANAMA CANAL

It begins to look now as though England is bent on making trouble over the clause in the canal bill that allows United States owned ships to pass without tolls. They claim it violates the Hav-Paucefore treaty. This is the clause of the treaty they base their of taxation. She is woefully behind other states in this regard and

"The canal shall be free and open to the vessels of commerce fully and of war of all nations observing these rules, on terms of entire - equality, so that there shall be no discrimination against any su nation or its citizens or subjects in respect of the conditions or

Like most legal documents this is subject to, at least, two interpretations, and just what the Hague will finally do with it is hard for the United States to discriminate in favor of any ships engaged most benefit to the people generally is the Parcel Post law which in foreign trade. Of course, ships doing business only between goes into effect January 1 1912. / United States points are entitled to special consideration, also our WATCH Roosevelt's realy to the charge made by Charles Edward battleships in time of war, but in building the canal this nation Russell that he (Teddy) siked Morgan over the telephone for \$100 really takes upon itself the trusteeship for the benefit of the entire | 000 in 1904. If Russell fells the truth, will that save him from world and there should be no discrimination in favor of any foreign membership in the Ananias Club?

There is just one exception to the above viz: the President should be given the power to place a larger toll upon ships of any Direct Legislation through the I. & A. The Initiative and Refernation that might subsidize or remit tells to their own vesseis, just endum was the most popular constitutional amendment in the list as he is now given the right to impose a larger tariff on those na- of 42 that the people of that state voted on September 3. tions that discriminate against us in tariff matters.

HONESTY IN POLITICS

This is an old, worn topic, but is brought to light just now by the New York police scandal. Many people say that the majority to a public office he becomes morally crooked. Semetimes believe that it is not always the elected man that is dishonest but There are viants in these days - Underwood, Clark, Wilson, Montague more often the people under him. Not every man who runs for office has the energy, ability and taste that are necessary to keep a proper check upon the people employed by the office he fills. For instance, we believe Mayor Gaynor to be a perfectly honest, upright Socialists fifth (with 976 votes). The legislature must elect the man, but that greatest, most perfect of organizations, Tammany Hall, had him completely "fooled," and graft and corruption have with the wishes of others has made his administration almost a Theodore Roosevelt is making history for the future generations of failure from the view point of the common people. There are other America to study when his strengton form to longer, with state at qualifications desirable in public officers besides honesty.

DOUBTFUL

WILL the November election result in the choice of a president sold in all the stores of the county? Enterprise and cooperation or by the electoral college? It is doubtful because the third party of the part of our farmers and merchants would solve the proteem Bull Moosers may prevent any candidate from getting a majority. Such a move would boom Prince William beyond the fondest anti-

coting in November. The one thing certain about publicans say it is due to some other cause. It would "knock the If You Wish a Ray of Sunshine in Your Home

HIDDEN MONEY

Otatistics show that the percentage of mency har outside of banks is greater than that lost thru bank failures by over 240 per cent. And yet people will store their money away in stockings, burean drawers, mattresses, carpets, etc., waiting for the thieves and flames. The stories of serious and nit. iable losses of this kind published during the past vear would fill a volume. They show that many murders have been caused by hidden money in some cases for ridiculously small amounts.
