PARCEL POST MARKETING

The American public will probably be a little slow in grasping the fact that since the first of the year, it may ship goods, butter, beef, fish, fresh meat, canned cheese, books, tobacco and green vegetables in any quantity, without any weight, value or dollar limit, without any additional mails, berries, orchard products or scores of other perishable commodities by mail. Yet, once thoroughly understood, we may expect the article to be quickly taken up. River stage will be open, and at any distance, whether in season, peak, or drought. Vegetables which might decay within certain limits. You may send fresh meat only to be received within one week, although some quantities may be stored by refrigerating or otherwise. You may expect farmers, especially farmers' wives and daughters, to work in large retail markets if they wish. It is the winter of the best and material of the most suitable for their purpose. They will have a great deal of knowledge of the market, the orders, the customs, and the handling of their business. We must overlook the opportunity. We seriously think they will let it slip by.
