This amendment, of course, has a long way to travel vet before becoming a part of the Constitution, as it must have a two-thirds vote of the lower house and be passed by the legislatures of three-fourths of the states. There has been but little serious comment in the press upon this matter and probably but few thinking men, outside of Mr. Bryan, have any decided opinion as to its their way back. merita. SUFFRACE IN THE SOUTH

Men in the Bothern States are at last realizing that we suffrage is bound to come. In the olden days men worshipped at the shrine of woman. Woman was placed on a pedestal, so to speak and men reverenced her. Gradually the change in economic conditions removed woman from the pedestal. She had to become a petition with man. At first men regarded the suggestion with "sus picion and alarm," but gradually they are coming around and are jawbone, fewer teeth, shorter arms and legs than the man of toas much intelligence as men and much keener intuition; and are now. The prospect is pleasant, since it means that there will just as capaule of selecting efficient and huncet public officials as two fewer toes to develop corns, fewer ribs to get smashed in autothe men are. They positively couldn't do worse. The truth is, the mobile accidents, smaller dentist bills, less jawing and a hand that greatest or position to woman suffrage comes from the "machine" will let a woman button up the back of her dress. WILSON'S APPOINTEES

Not a few of the men who have been nominated for office by President Taft have an idea that they will succeed in winning the favor of the incoming President in case the Senate refuses to confirm them before March 4. Just now there is no likelihood that they will be confirmed. Whether they are justified in expecting. or ever hoping, that Gov. Wilson thinks of keeping them in office is something no man can find out. The Governor has made the Sphinx look communicative in comparison, by his monumental dis play of reticence. It is a very open secret in Washington that good many public officials expect to be retained in office under the new administration. There is Secretary of the Interior Fisher, and Asssistant Secretary Adams, and some of the President's clerks at the White House, and-but what is the use of calling the roll of The amendment to the Constitution providing for an income tax officialdom?
