## Introduction

A build-out analysis shows the maximum planned future development within a locality. Such an analysis does not show the ideal or preferred conditions but provides an assessment of the current zoning districts, long-range land use of undeveloped lots, and potential redevelopment areas. The resulting charts, numeric data, and graphics depict how Prince William County is changing.

The County's geographic information system (GIS) has been used to create layers and tables to monitor different types of development within the County at a parcel or project level. Using GIS, the Planning Office can track areas that are developed, developing, or undevelopable such as conserved or protected lands, publicly owned lands, parks, cultural resources, etc. These layers are compared to determine remaining and future growth capacity.

This build-out analysis is prepared annually by the Planning Office. Each update is based on occupancy permits, rezonings, special-use permits, and comprehensive plan amendments that have been issued or approved during the year. The data provided in this report show the quantity of residential units built and an approximation of units yet to be built, commonly referred to as the "pipeline". Non-residential development is similarly analyzed based on building floor area. This report also includes estimates of residential and non-residential capacity in revitalization areas. The existing density or intensity in these areas is less than currently allowed.

Supplemental sections provide information regarding parks and existing land use. Parkland acreage generally increases each year as new land is acquired. Also included is a listing and map of current land uses in the County by category.

# Introduction

## Component Areas

The primary component areas of the Build-Out Analysis are the developed area, undeveloped area, residential inventory, non-residential inventory, revitalization areas, and the rural area. These areas do not include cities, towns, or large water bodies within the County. The Component Areas Map (page 12) provides a graphic of these areas within the County. The geographic sizes and locations of these areas change as land development projects evolve. As land changes from being undeveloped to zoned and finally developed, it moves through these categories. Some older developed areas of the County are planned for redevelopment.

### Developed Area

The developed area contains both residential and non-residential projects that have reached completion with no additional land area available for development. Public facilities, religious institutions, cemeteries, and other similar features that may or may not be fully developed are assumed to be built to their full potential in this area.

### Undeveloped Area

The undeveloped area is A-1 zoned land that is not in the rural area and has not been developed. Some larger tracts of undeveloped R-4 and B-1 zoned lands designated in 1958 when zoning was established in the County and currently planned for a different use were also added. This analysis assumes that these areas will be rezoned to a higher intensity use in accordance with the *Comprehensive Plan*. For calculating potential development, the *Comprehensive Plan's* long-range land use designation was used. These designations offer a high and low range for residential development and a high and average range for non-residential development. An approximate mid-range was used for residential calculations and the average was used for non-residential calculations.

### Development Area Residential and Non-Residential Inventories

These areas contain projects that have rezoning approval by the Board of County Supervisors. The projects can be in any phase of development. Some projects may be in the middle of the construction process, some may just contain a pad site that is undeveloped, while others may be a project in which no development has started. Tables 7 and 10 give a breakdown by individual project in these areas.

## Quick Facts!

Residential build-out capacity by component since 2008.

# Introduction

## Revitalization Areas

The revitalization areas are focused on three areas within the County identified for redevelopment. Woodbridge, Triangle, and Yorkshire are older commercial corridors that are not utilized to their full potential in their current zoning district or their long-range land use classification. Some larger tracts of undeveloped R-4 and B-1 zoned lands designated in 1958 when zoning was established in the County and currently planned for a different use were also added. This analysis assumes that these areas will be rezoned to a higher intensity use in accordance with the *Comprehensive Plan*. For calculating potential development, the *Comprehensive Plan's* long-range land use classification was used. These classifications offer a high and low range for residential development and a high and average range for non-residential development. An approximate mid-range was used for residential calculations and an averaged floor area ratio (FAR) was used for non-residential calculations.

In the Woodbridge area, VDOT is implementing the Route 1 widening project resulting in right-of-way acquisitions that potentially leave remnant parcels for future redevelopment. This, in some instances, provides a newly cleared lot that may receive more appropriately denser development when redeveloped. In turn, this continues to shift some of the potential build-out numbers in their prospective long-range land use categories. Additionally, some areas identified as redevelopable have been removed from this analysis when property owners have substantially renovated or redeveloped their property.

## Rural Developed or Preserved Area

The rural area encompasses more than 50 percent of the County. This area contains large lot residential land tracts, parks, agricultural and forestal land, along with numerous small businesses. Manassas National Battlefield Park and Prince William Forest Park are in this area. These parks are included in the total acreage but not used for calculations as no development will occur in these areas. Marine Corps Base Quantico is also in the rural area, which includes large-scale residential and non-residential uses, but is not included in the report as it is not subject to County zoning. The base comprises approximately 22,763 acres representing 19 percent of the rural area or 10 percent of the County total. The current long-range land use and A-1 zoning district of the rural area allows only potential residential calculations based on lot size. Non-residential uses are allowed within the rural area, but there is no process by which to determine future growth potential.

# Introduction

## Rural Undeveloped Area

This area contains buildable lots less than 20 acres with no residential dwelling. It also contains larger parcels that may or may not contain a residential dwelling and calculates how many additional lots could be created through 10-acre subdivision. It does not account for family subdivisions which typically create smaller legal lots.

## Rural Area Residential Inventory

This area contains projects that have rezoning approval by the Board of County Supervisors and numerous by-right subdivisions that have been filed and accepted. These projects can be in any phase of development. Some projects may simply have a subdivision plan filed, others could be in the middle of the construction process. The remainder may be approved projects where no development has started. Table 8 gives a breakdown by individual project of this area.

# Introduction

## Executive Summary

The Build-Out Analysis shows that Prince William County has capacity for 28,020 additional residential dwelling units as shown in Table 1 (page 7). Adding this to the 154,812 units that existed as of December 2018 brings the residential build-out to 182,832 units. There is also a potential for 78.1 million non-residential square feet of gross floor area to be built. Adding this to the 91.3 million square feet of gross floor area already built brings the total to 169.4 million non-residential square feet, as shown in Table 2 (page 7). The information generated for the Build-Out Analysis helps to provide the data and methodology used by staff to arrive at these conclusions.

## Quick Facts!

The Residential Build-Out Analysis shows a capacity of 182,832 units.

<b>Total</b>	<b>169.4</b>	

# Build-Out Analysis

## Undeveloped Area Analysis

An analysis of the approximately 7,383 acres (table 14 – page 38) of undeveloped land within the development area shows that 8,033 additional residential units could be built if this land was zoned consistently with the *Comprehensive Plan*, using the mid-point density range (table 3). This area also holds the potential for 20.2 million square feet of non-residential gross floor area (table 4). In addition to potential growth, this area currently contains 364 existing residential units and 14,062 non-residential square feet of gross floor area.

<sup>1</sup> See List of Abbreviations (page 44) and the *Comprehensive Plan's* Long-Range Land Use chapter for explanation of land uses.

<sup>2</sup> See table 12 – page 37

# Build-Out Analysis

## Residential Inventory Analysis

An analysis of the approximately 12,411 remaining acres of land already zoned for residential or mixed-use development, but partially developed or undeveloped within the development and rural areas, shows that there are approximately 14,263 residential units yet to be built (tables 7 and 8 – pages 13 through 21). Additionally, a data column has been added to these tables to indicate active zoning cases. These are cases where some type of development is currently occurring. While residential inventory land is removed when projects are completed, rezonings and proffer amendments added 32 additional acres and 152 new residential units to the total in 2018 (table 9 – page 22). The rural area also had additional new subdivisions added to the inventory.

## Non-Residential Inventory Analysis

An analysis of the approximately 5,763 acres of land in the development and rural areas already zoned for non-residential or mixed-use development, but undeveloped or partially developed, shows that there is at least 55.8 million square feet of gross floor area of non-residential development zoned and unbuilt (table 10 – page 23 through 34). Rezoning and special use permits added 153 acres and 1,756,990 square feet gross floor area to the total in 2018. (table 11 – page 35 and 36).

# Build-Out Analysis

## Revitalization Areas Analysis

This is an analysis of 1,349 acres (table 15 – page 38) of land in the development area that is zoned non-agricultural but has redevelopment potential for residential, non-residential, and public uses. This area also contains 151 acres designated ER<sup>1</sup>. The three revitalization areas currently contain 1,741 existing housing units. Using the current long-range land use classification of each area taking into account the existing 1,741 housing units, these areas could yield an additional 3,064 housing units (table 5). This area also has the potential for an additional 2,110,647 square feet of non-residential development (table 6). Currently this area contains 992,474 square feet of non-residential gross floor area to be developed.

### Table Legend Notes:

<sup>1</sup> See List of Abbreviations (page 44) and the *Comprehensive Plan's* Long-Range Land Use chapter for explanation of land uses.

<sup>2</sup> See table 12 – page 37

# Build-Out Analysis

## Developed Area Analysis

This is an analysis consisting of approximately 81,285 acres of land in the development area that is developed with residential and non-residential uses referred to as the developed area. Generally, each year the calculated size of the developed area increases as land develops unless previously developed land becomes undeveloped. Public facilities, road right-of-ways, religious institutions, public and private permanent open space areas, protected HOA lands, and large established businesses were considered as developed land when reviewing this area and included in the totals. As of December 2018, 87.8 million non-residential square feet of gross floor area has been built in this area along with 138,133 residential units. The developed area does not include the undeveloped, revitalization, residential inventory, non-residential inventory, or rural areas.

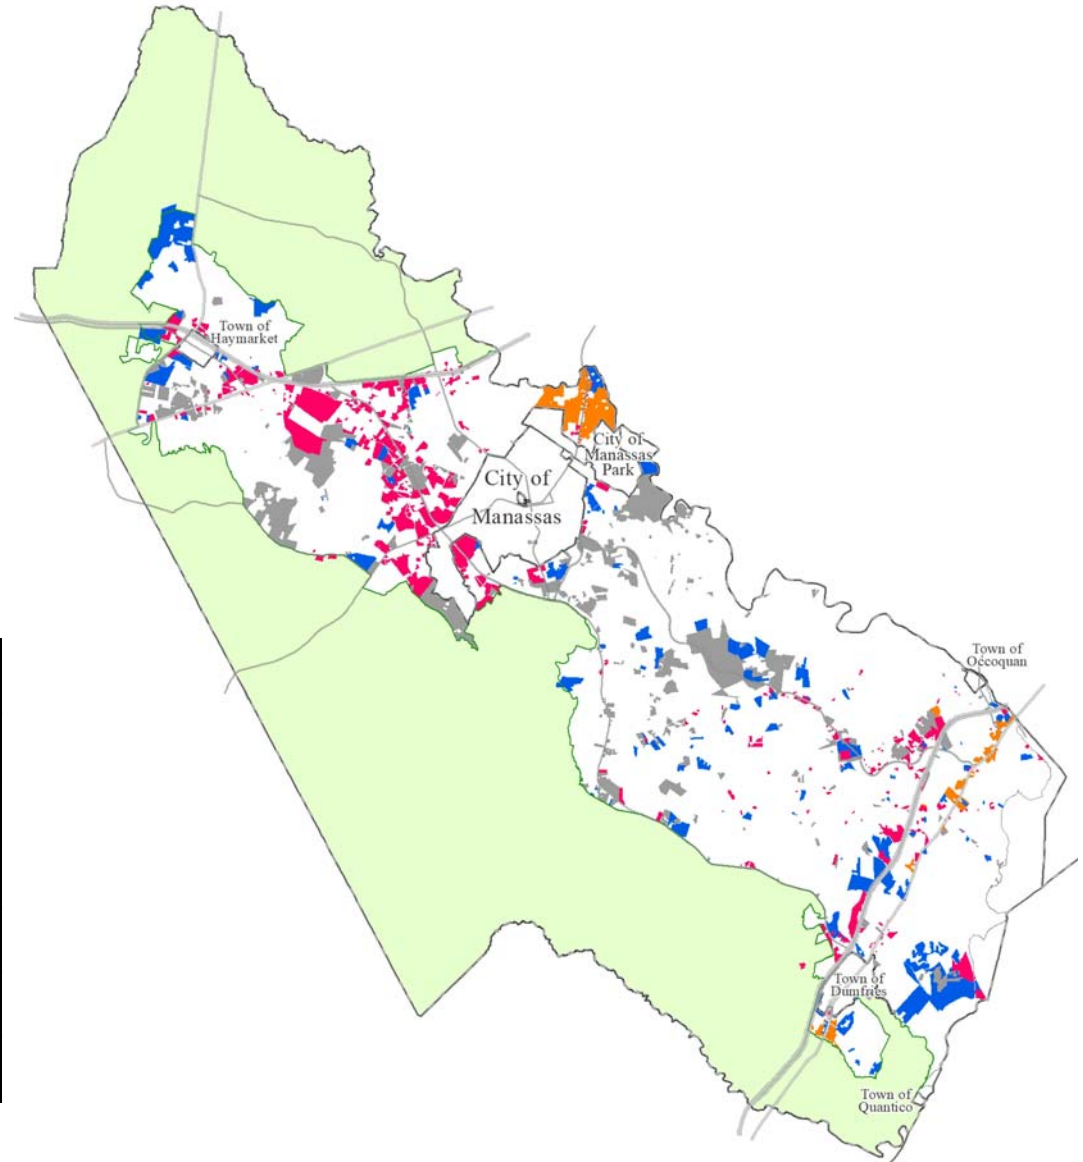

## Rural Area Analysis

The rural developed or preserved area contains lands that have already been developed or protected. This area contains approximately 60,311 acres of land. The entire rural area contains 117,047 acres which is approximately 54 percent of the land area in Prince William County, of which approximately 22,763 acres are in Marine Corps Base Quantico. The rural area analysis does not include any residential units that might be built on Marine Corps Base Quantico. Public facilities, religious institutions, public and private permanent open space were not considered for further development. Large established businesses with substantial infrastructure investment were considered as developed land when calculating residential units. The rural undeveloped area is an analysis consisting of approximately 26,585 acres that are undeveloped or underdeveloped. This area shows that approximately 2,660 more residential units could be built in this area through 10-acre subdivision or development of vacant lots not in existing subdivisions. The rural area does contain residentially rezoned and subdivided lands that are tracked separately in the rural area residential inventory section of this report (table 8 – page 19). An increased trend of recorded residential subdivision plats on farms and other agricultural businesses not previously in the rural housing calculation, have been moved into the rural area residential inventory section of this report by their subdivision name. Occupancy permits indicate that, within the rural area, 87 residential units were built in 2018.

Privately owned parcels 20 acres or larger were found to have the potential for 1,799 more housing units. There are also 861 undeveloped lots available that are less than 20 acres. The rural area currently contains 7,827 existing residential units. The rural area also contains 2.9 million non-residential square feet of gross floor area. This does not include any facilities or residential units on Marine Corps Base Quantico whose 22,763 acres were included in the total land area. The Manassas National Battlefield Park and Prince William Forest Park are among some of the other large features in this area that continue to acquire rural lands, removing them as potential residential uses.

## Inventory of Units in Residential Rezoning Remaining to be Built as of December 31, 2018

### Column descriptions:

**Case Name** - This column indicates the current name attached to the zoning case. A marketing or subdivision name was shown on some cases in parentheses.

**Case Number** - This column indicates the case number attached to the zoning case.

**Zone** - This column indicates the zoning district of the zoned land. Text of "AR" indicates the zoning district is Age-Restricted.

**Type** - This column indicates the unit type counted in the inventory, either single-family detached (SF), single-family attached (i.e., townhouse) (TH), or multi-family attached (MF). An "M" indicates that the mix of units has been estimated because the proffers allow the developer flexibility of unit type.

**Approved** - This column indicates the maximum number of units permitted by proffers where applicable. In cases without proffers or where the proffers did not specify the maximum, a maximum theoretical yield was calculated based on the zoning district and acreage. An "@" indicates a calculated unit total. An "!" indicates the actual number of approved units has been reduced to match the subdivision plat or remaining area and may no longer give the entire rezoning quantity.

**Built** - This column reflects the number of completed units based on assigned premise addresses that have been issued a certificate of occupancy.

**Active** - This column indicates cases that have some type of development occurring at the time of this report.

**Remaining** - This column indicates the difference of Approved and Built and indicates the number of units yet to be built for that rezoning case or portion of.

**District** - This column indicates the Magisterial District containing the Zoning Case. An "\*" indicates the zoning case is in more than one district.

For additional symbol explanation, refer to the notes at the end of the table.

Notes:

1. Case Names ending in "- BOCS" are from the original 1958 BOCS rezonings or later BOCS initiated and approved rezonings. In these instances, the subdivision or owner name is the Case Name. Case with "(SUP)" at the end of the name are special use permits that added residential units.
2. Zoning Districts marked with "AR" contain Age-Restricted housing.
3. Unit types marked with an "M" indicate that the mix of units has been estimated as the proffers allow the developer flexibility of unit type.
4. Unless otherwise noted, approved units are based on recorded proffers. Cases marked with a "¶" have monetary proffers. Cases marked with an @ are not proffered and the approved number of units is a theoretical yield considering allowed lot size and buildable area. Approved units marked with an exclamation point (!) indicates the actual number of approved units have been reduced to match the subdivision plat or remaining area and no longer gives the entire rezoning quantity.
5. Built units are based on 12/31/2018 GIS Premise Address database using occupancy permits issued.
6. Cases marked with an asterisk (\*) overlap into an adjoining District. The District name indicated contained more of the project area in these instances.
7. This total represents the total of the residential inventory in the development area and does not include units in the rural area.
8. This total represents the total number of units that are potentially going to be completed in the near future as these cases are actively being developed.

## Residential Inventory

# Inventory of Units in Rural Area Residential Rezonings Remaining to be Built as of December 31, 2018

### Column descriptions:

**Case Name** - This column indicates the current name attached to the zoning case. A marketing name was shown on some cases in parentheses.

**Case Number** - This column indicates the case number attached to the zoning case.

**Zone** - This column indicates the zoning district of the zoned land.

**Type** - This column indicates the unit type counted in the inventory, either single-family detached (SF), single-family attached (i.e., townhouse) (TH), or multi-family (MF).

**Approved** - This column indicates the maximum number of units permitted by proffers where applicable. In cases without proffers or where the proffers did not specify the maximum, a maximum theoretical yield was calculated based on the zoning district and acreage. An "@" indicates a calculated unit total. An "!" indicates the actual number of approved units has been reduced to match the subdivision plat or remaining area and no longer gives the entire rezoning quantity.

**Built** - This column reflects the number of completed units based on assigned premise addresses that have been issued a certificate of occupancy.

**Active** - This column indicates cases that have some type of development occurring at the time of this report.

**Remaining** - This column indicates the difference of Approved & Built and represents the number of units yet to be built for that rezoning case or portion of.

**District** - This column indicates the Magisterial District containing the Zoning Case. An "\*" indicates the zoning case is in more than one district.

For additional symbol explanation, refer to the notes at the end of the table.

Notes:

1. Unless otherwise noted, approved units are based on recorded proffers. Cases marked with a "¶" have monetary proffers. Cases marked with an @ are not proffered and the approved number of units is a theoretical yield considering allowed lot size and buildable area. Approved units marked with an exclamation point (!) indicates the actual number of approved units have been determined by a subdivision plat, or remaining area, and may no longer give the entire rezoning or subdivision quantity.
2. Built units are based on 12/31/2018 GIS Premise Address database using occupancy permits issued.
3. Case Names ending in "- BOCS" are from the original 1958 BOCS rezonings or later BOCS initiated and approved rezonings. In these instances, the subdivision name is the Case Name.
4. This total represents the total units yet to be built in this report.
5. This total represents the number of units that will potentially be completed in the near future, as these cases are actively being developed.

# Residential Inventory

## Rezoning Approved by the Board of County Supervisors that Created Additional Residential Units in 2018

Table 9

1/1/2018 through 12/31/2018

Case Number	Case Name	Acreage	Single Family Units	Townhouse Units	Multi-Family Units	Unit Total	Approval Date	District

**Column descriptions:**

- Case Number** - This column indicates the case number attached to the zoning case.
- Case Name** - This column indicates the current name attached to the zoning case.
- Acreage** - This column indicates the amount of rezoned land area in acres.
- Single Family Units** - This column indicates the approved quantity of detached single-family dwelling units.
- Townhouse Units** - This column indicates the approved quantity of attached single family dwelling units.
- Multi-Family Units** - This column indicates the approved quantity of attached multi-family dwelling units.
- Unit Total** - This column indicates the sum of dwelling units in the three categories.
- Approval Date** - This column represents the date the rezoning was approved by the Board.

# Non-Residential Inventory

## Inventory of Non-Residential Rezoning Remaining to be Built as of December 31, 2018

### Column descriptions:

**Case Name** - This column indicates the current name attached to the zoning case. Cases with "(SUP)" at the end of the name are special use permits. A marketing name was shown on some cases in parentheses.

**Case Number** - This column indicates the case number attached to the zoning or special use permit case.

**Zone** - This column indicates the zoning district of the zoned land.

**Remaining Acreage** - This column indicates the acreage that is still available to be built upon. This can represent the entire or a partial amount of the zoning or special use permit case.

**Remaining Square Feet** - This column indicates the potential amount of non-residential square feet that remains to be built of the indicated portion of the zoning or special use permit case.

**District** - This column indicates the Magisterial District containing the zoning or special use permit case. An "\*" indicates the case is in more than one district.

For additional symbol explanation, refer to the notes at the end of the table.

Notes:

1. Case Names ending in "-BOCS" are from the original 1958 BOCS rezonings or later BOCS initiated and approved rezonings. In these instances, the subdivision or project name is the Case Name. Cases with "(SUP)" at the end of the name are special use permits.
2. The remaining acreage was determined to be the land available to be developed or the entire zoned area dependent on the zoning case. In some instances, this acreage may reflect only a small amount of the original rezoning or special use permit case. The acreage indicated was calculated by using the County's GIS software.
3. The remaining building area was calculated by several different methods. Most zoning cases (primarily older) were calculated by using modified FAR values. These values were adjusted to reflect current trends in development. Other cases use the proffered or conditioned building area amounts, or specific proffered or conditioned FAR values.
4. Cases marked with an asterisk (\*) overlap into an adjoining District. The District name indicated contained more of the project area in these instances.
5. Dale City RPC undeveloped land was calculated using the FAR of the B-1 zoning district. Dale City consists of multiple zoning cases to include portions of: REZ1968-0001, REZ1969-0018, REZ1975-0014, REZ1999-0017, and REZ1999-0039.
6. The total is not the absolute total acreage to be built upon for non-residential purposes. This total represents the total acreage listed in this report containing only major zoning and special use permit cases with structures yet to be built. Many older by-right parcels were not projected.
7. The total is not the absolute non-residential building area to be built for non-residential purposes. This total represents the square feet listed in this report containing only major zoning and special use permit cases with structures yet to be built. Many older by-right parcels were not projected.

# Non-Residential Inventory

## Rezoning and Special Use Permits Approved by the Board of County Supervisors for Non-Residential Development that Created Additional Non-Residential GFA

1/1/2018 through 12/31/2018

### Column descriptions:

**Case Number** - This column indicates the case number attached to the planning case.

**Case Name** - This column indicates the current name attached to the planning case.

**Acreage** - This column indicates the amount of non-residential land area in acres.

**Zone** - This column indicates the zoning district of the zoned land.

**Total Sq Ft** - This column indicates the total gross floor area (GFA) approved by the Board.

**Application Type** - This column indicates the planning case type, i.e. rezoning (REZ), proffer amendment (PRA), or special use permit (SUP).

**Approval Date** - This column represents the date the case was approved by the Board.

**District** - This column indicates the Magisterial District containing the zoning or special use permit case. An "\*" indicates the case is in more than one district.

## Undeveloped Area by Long-Range Land Use

The development potential of undeveloped A-1 lands within the development area tables 3 and 4 (page 8) is calculated from the values in table 14. Some long-range land use classifications (CEC, RCC, and REC) are used in both residential and non-residential calculations as they offer a mix of potential development. A portion of the ER (793 acres) that falls within the SRR classified parcels was added to the SRR acreage during the calculation process to obtain the 3,716 acres on table 3 (page 8) as the density calculation may include the ER area of the project in this land use classification. The average FAR was used for calculations to determine mid-range or average totals.

## Revitalization Areas by Long-Range Land Use

The development potential of underdeveloped lands within the revitalization areas tables 5 and 6 (page 10) is calculated from the values in table 15. Some long-range land use classifications (CEC, REC, UMU, and VMU) are used in both residential and non-residential calculations as they offer a mix of potential development. The average FAR was also used for calculations to determine mid-range or average totals.

# Parkland Inventory

## Parks

Parkland is distributed throughout all areas of the County. For calculations within this report, parks and open space lands are generally interpreted as developed land. New development often brings new parkland through subdivision or proffers. Additionally, new parkland is acquired, conservation easements are recorded, and historical and cultural resources are protected. The County goal, established in the *Parks, Recreation and Tourism* chapter of the *Comprehensive Plan*, is to provide 70 acres of parkland per 1,000 people. This goal is further defined to contain 15 acres of County-owned parkland for every 1,000 people. The larger standard was created as a means of taking into account the large amount of federal and state parkland that are available in the County. The recent land annexation granted to Manassas Park removed two prominent parks from the parkland total. The estimated total parkland is 29,673 acres.

The County's GIS was used to calculate acreage totals from the parks layer. The Department of Parks, Recreation and Tourism manages at least 74 parks totaling at least 5,188 acres. Additionally, the GIS indicates that the School Board controls approximately 866 acres of parkland. This produces a total of 6,054 County directed acres of parkland.

The estimated population for Prince William County on December 31, 2018 was 465,346 (Demographic 2018 – 4<sup>th</sup> Quarter Estimate). Thus, the County currently has 65.6 acres of parkland per 1,000 people and 12.6 acres per 1,000 people of County-owned parkland.

# Parkland Inventory

## Park Type Descriptions

### **Neighborhood Park**

This general classification of parks includes parks that serve neighborhoods and mixed-use centers in suburban and urban areas of the County. Neighborhood parks primarily offer a variety of active or passive recreation opportunities, or a combination of both, in close proximity to residences and employment centers. Areas designated for natural and/or cultural resource protection may also be included within these parks.

### **Community Park**

This park classification includes larger parks that serve larger geographic areas of the County and provide a variety of indoor and outdoor recreation facilities and park experiences. Portions of these parks may be designated for natural and/or cultural resource protection.

### **Regional Park**

This park classification includes larger parks that serve the County and provide a variety of larger-scale indoor or outdoor recreation facilities, or both, and facilities that are unique within the County. Areas designated for natural and/or cultural resource protection and management may also be included within these parks.

### **Linear and Resource-Based Park**

This classification includes parks that primarily preserve, protect, and interpret natural and/or cultural resources.

### **Leased Park**

This classification includes lands leased by the County for park use.

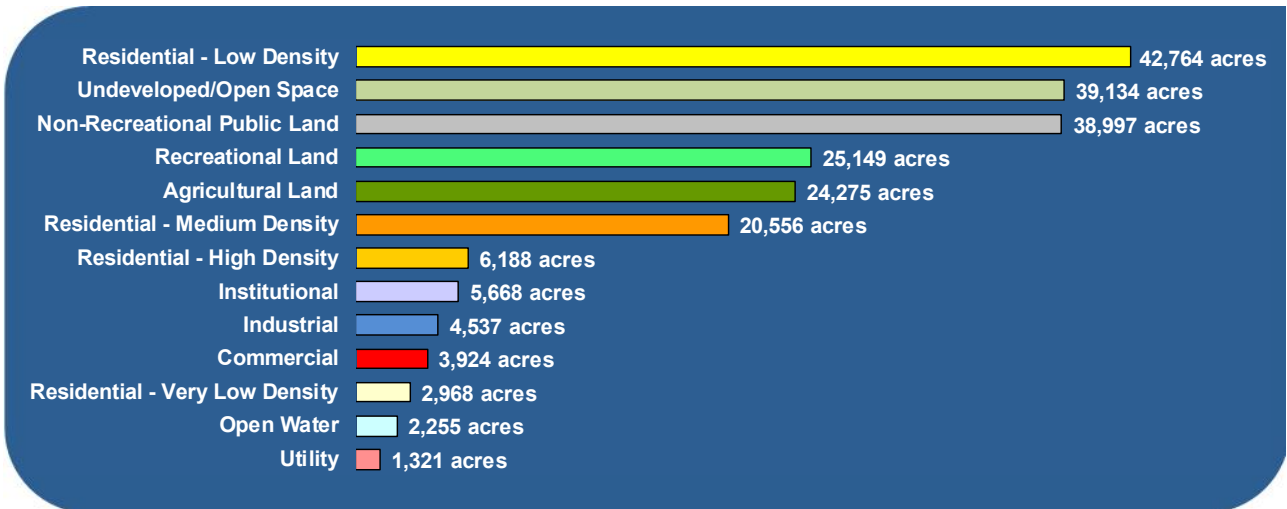

### **School-Community Use Park**

This classification includes active and passive recreation areas of County schools. These lands are owned by the County School Board and are not counted toward the County's park total at this time although the Department of Parks & Recreation programs and maintains some of them. The overall land total is divided equally between park and open space acreage totals.

# Current Land Use Analysis

## Current Land Use

This is an analysis of the current land use conditions of the lands of Prince William County. These acreage totals no longer include the towns within Prince William County. Real Estate Assessment data was linked to each parcel to determine the current use or status. These categories were developed in conjunction with the Watershed Management Division of Public Works for watershed planning purposes.

**Agricultural Land** – Farming and livestock uses.

**Commercial** – Developed businesses, shopping areas, office clusters, restaurants, and hotels.

**Industrial** – Industrial parks, manufacturing facilities, warehousing, landfills, and quarries.

**Institutional** – Schools, churches, colleges, universities, cemeteries, police and fire stations, libraries, county buildings, and other public assembly facilities.

**Non-Recreational Public Land** – Lands owned by the state and federal government, Virginia Department of Transportation rights-of-way, and Marine Corps Base Quantico.

**Undeveloped/Open Space** – Undeveloped land and protected open space areas, as well as residential and non-residential parcels not yet developed.

**Open Water** – Large bodies of water, primarily the Potomac and Occoquan Rivers.

## Current Land Use Analysis

**Recreational Land** – Parklands owned by Prince William County, along with state and federal parks.

**Residential-High Density** – Developed residential lots of less than 6,000 square feet.

**Residential-Medium Density** – Developed residential lots between 6,000 square feet and 1 acre.

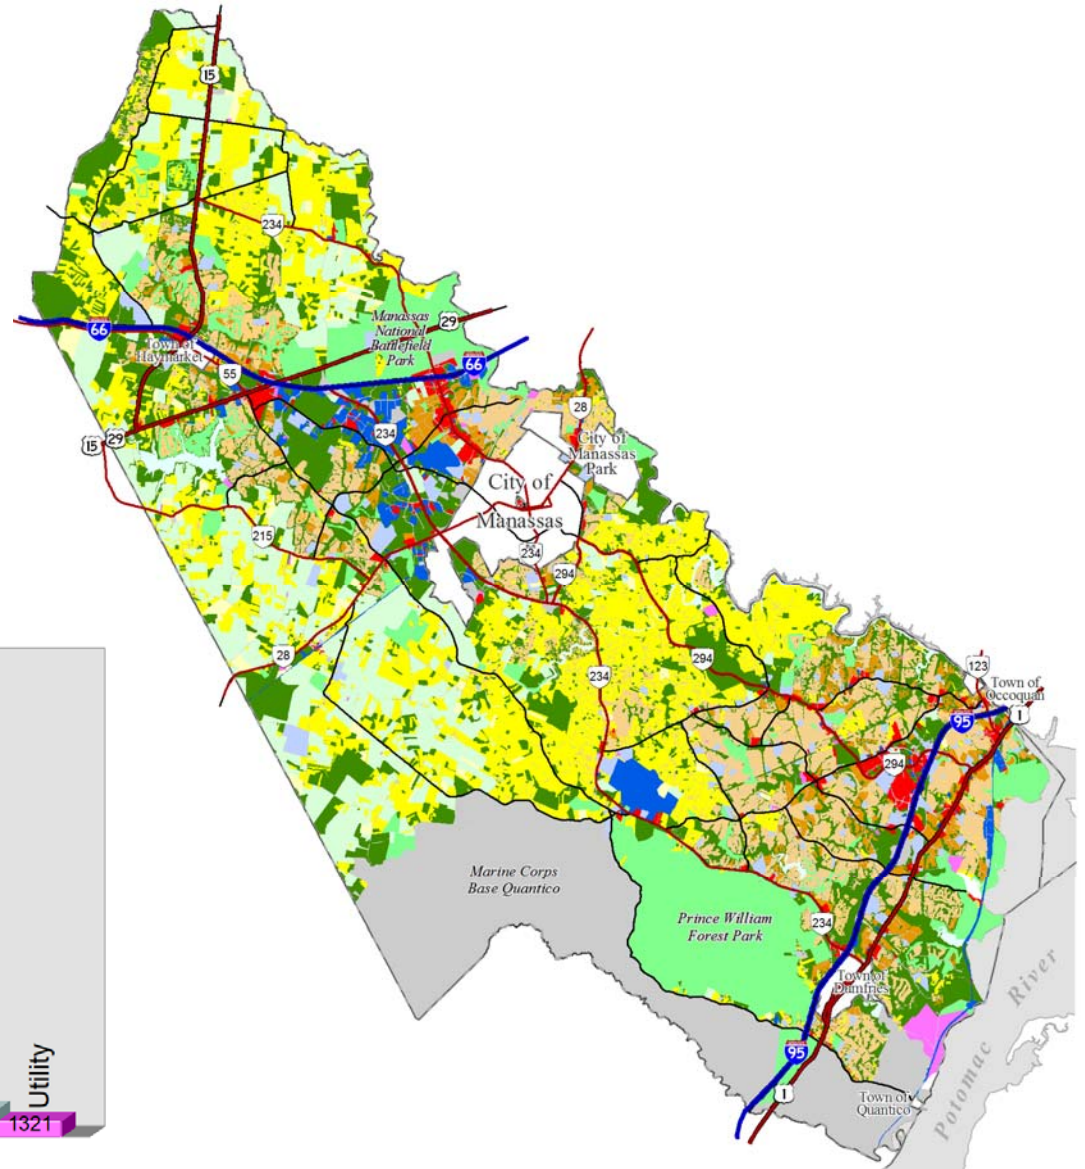

**Residential-Low Density** – Developed residential lots between 1 and 20 acres.

**Residential-Very Low Density** – Developed residential lots greater than 20 acres.

**Utility** – Power and pipeline rights-of-way, solid waste disposal facilities, and power plants.

<b>SR-5</b>	Semi-Rural Residential zoning district		
<b>SR-5C</b>	Semi-Rural Residential Clustered zoning district		
<b>SRH</b>	Suburban Residential High long-range land use classification		

# Links and Additional Information

Current and previous versions of the “Build-Out Analysis”, the methodology used to create it, and a “How-To” for using County Mapper XM to find a zoning case can be found at:

<http://www.pwcgov.org/BuildOutAnalysis>

The County Mapper XM interactive GIS application can be accessed here:

<http://www.pwcgov.org/CountyMapper>

An interactive map of pending planning cases can be found at:

<http://www.pwcgov.org/PendingCasesMap>

The Planning Office can be contacted by email at [Planning@pwcgov.org](mailto:Planning@pwcgov.org)

The screenshot shows the Prince William County website's 'BUILD OUT ANALYSIS' page. The page has a blue header with the county logo and navigation links. Below the header is a search bar and a section with four aerial images labeled '1937', '1998', '2006', and '2015' under the heading 'PLANNING'. The main content area features a sidebar with links such as 'Planning Home', 'Developing Our Community', and 'Build-Out Analysis'. The 'BUILD OUT ANALYSIS' section includes a description of the report and a list of previous years' analyses from 2009 to 2017. At the bottom, there is a 'METHODOLOGY AND OTHER BUILD-OUT ANALYSIS RESOURCES' section with a link to the methodology page and a subscription form for notifications.

This collage features a map of pending planning cases on the left, a 3D visualization of the methodology in the center, and the Prince William County seal on the right. The text 'Build-Out Analysis' is prominently displayed at the top, and 'Methodology' is at the bottom.
