SCHOOLS			
Intent			
One of the most important services that Prince William County can provide to its citizens is a countywide education system that meets the highest educational standards. An inventory of school sites and facilities that meet established level of service (LOS) standards is a major factor in providing this high-quality education. Such an inventory is also valuable in attracting quality economic development and employers who seek the best public facilities available to their employees. It is the intent of the Schools Plan to acquire sufficient and appropriate educational facilities to serve current residents as well as new populations generated by new residential development, and in locations that best serve County school children.			
LOS standards for school facilities, which are to be provided countywide, are contained in ED-POLICY 1 and 2, and Table 1. LOS for schools is defined as no more than 100% utilization on a countywide-basis. LOS standards include maintenance of student capacity – to prevent erosion of current service – and proportion of schools built compared to future projected needs as calculated in Table 1. Table 2 lists basic school site standards.			
Future school needs are projected by the Prince William School Board. The number of students forecast to be generated from the County population is computed, based on existing enrollment plus projected enrollment. Additional students are forecast by multiplying projected housing units by the appropriate student generation factor. A student generation factor is a multiplier used to calculate the number of students attending each school level (elementary, middle, and high); it is based on the housing unit type – single-family detached, townhouse, or multifamily. These LOS are used to quantify per unit monetary costs for providing quality countywide educational facilities – according to recognized and accepted state and local standards – for children attending from newly developed residential areas where current or projected and already funded program capacities cannot accommodate that new development at established LOS. These LOS standards are the basis for County requests for monetary contributions and/or school sites for new school facilities.			
The components of the Schools Plan are:	Delete – redundant wording (Planning)		
• Intent, Goal, Policies, and Action Strategies			
• School Location/Design Criteria Guidelines			
• Projected School Needs (Table 1)			
• Basic Site Standards for School Facilities (Table 2)			
• Existing and Projected School Facilities Maps (Figures 1-3)			
• Level of Service Standards for Public Schools (Appendix A)			
GOAL: Ensure, through public and private expenditures, the timely provision of school sites and facilities that serve Prince William County school children countywide, in accordance with established level of service standards for location, cost, and program quality.			
ED-POLICY 1: Provide school sites and facilities that will give a full range of programs and related services to effectively meet the educational needs of current and future residents and their school-age children.			
ACTION STRATEGY:			
ED1.1 Maintain LOS standards for school sites and school facilities by:			
ED1.1a Providing sufficient school facilities in order to ensure that the percentage of utilization of county schools does not exceed 100% capacity. Capacity excludes portable classrooms.			

Proposed	Comments	Type	New Location
ED1.1b Designing new facilities and additions to and/or renewal of existing facilities in accordance with the standards identified in ED-POLICY 2 and 3.			
ED1.1c Providing sufficient school facilities in order to meet future projected needs.			
ED-POLICY 2: Ensure the timely acquisition of school sites and construction of school facilities through the development approval process and other means as appropriate.			
ACTION STRATEGIES:			
ED2.1 Require mitigation of for the impact of proposed new residential development on the LOS of current and projected school enrollments as a result of the proposed new residential development for which a rezoning and/or special use permit is requested.	Clarification (PWCS) Update for proffer legislation (Planning)		
ED2.2 Encourage the dedication of schools sites in areas anticipating a current or future need for new school facilities. The dedicated sites should meet the school location/design criteria below preferences outlined in Action Strategy ED2.8 and the basic site standards contained in Table 2.	Preferences clarification (PWCS) Action Strategy clarification (Planning)		
ED2.3 Place top priority on siting schools within the boundaries of new developments, especially with the objective of making elementary schools easily accessible to parents and students via pedestrian facilities.			
ED2.4 Develop a procedure for determining the price of donated land between the assessed value and the value of the land once rezoned.			
ED2.5 Permit portable classroom facilities, as needed, to accommodate student capacity needs, programmatic needs, and school facility renovations. If so used, they are deemed a feature shown on the plan and do not require public facility review.	Edit		
ED2.6 Construct school additions to provide adequate capacity and support facilities that are consistent with the School Location/Design Criteria Preferences , as specified in ED-Policy 2 , Action Strategy ED2.8 . Provided that such additions do not exceed the maximum student capacity per school, as provided in Table 1, they are deemed a feature shown on the plan and do not require public facility review.	Preferences clarification (PWCS) Action Strategy clarification (Planning)		
ED2.7 Construct improvements to school sites, as needed, such as drives, parking, middle and high school athletic field lighting, general purpose lighting, bleachers, and playing fields. Such features associated with operation of the school shall be deemed a feature shown on the plan and do not require public facility review.	Clarification (PWCS)		
ED2.8 Use the following location and design criteria for new schools sites.			
• School Location/Design Preferences Criteria:	Preferences clarification (PWCS)		
ED2.8.a Locate schools sites near the centers of projected student populations, to reduce the need for busing and excessive walking distances.	Field lights have been added to middle schools.		
ED2.8.b Design and develop school sites and additions to provide undisturbed natural buffers and where natural vegetation between the school and adjoining properties does not exist, provide adequate buffering vegetation.			
ED2.8.c Adequately buffer schools from industrial and commercial facilities, pollution, and other hazards.			
ED2.8.d Provide safe access for pedestrians and motorized and non-motorized vehicles.			
ED2.8.e Provide school sites free of major power lines, major utility easements, major drainage ways, and/or major floodplains.			
ED2.8.f Locate schools adjacent to compatible uses, with the approval of the School Board. Evaluate the compatibility of adjacent fire station sites on a case-by-case basis.	Clarification (Planning)		

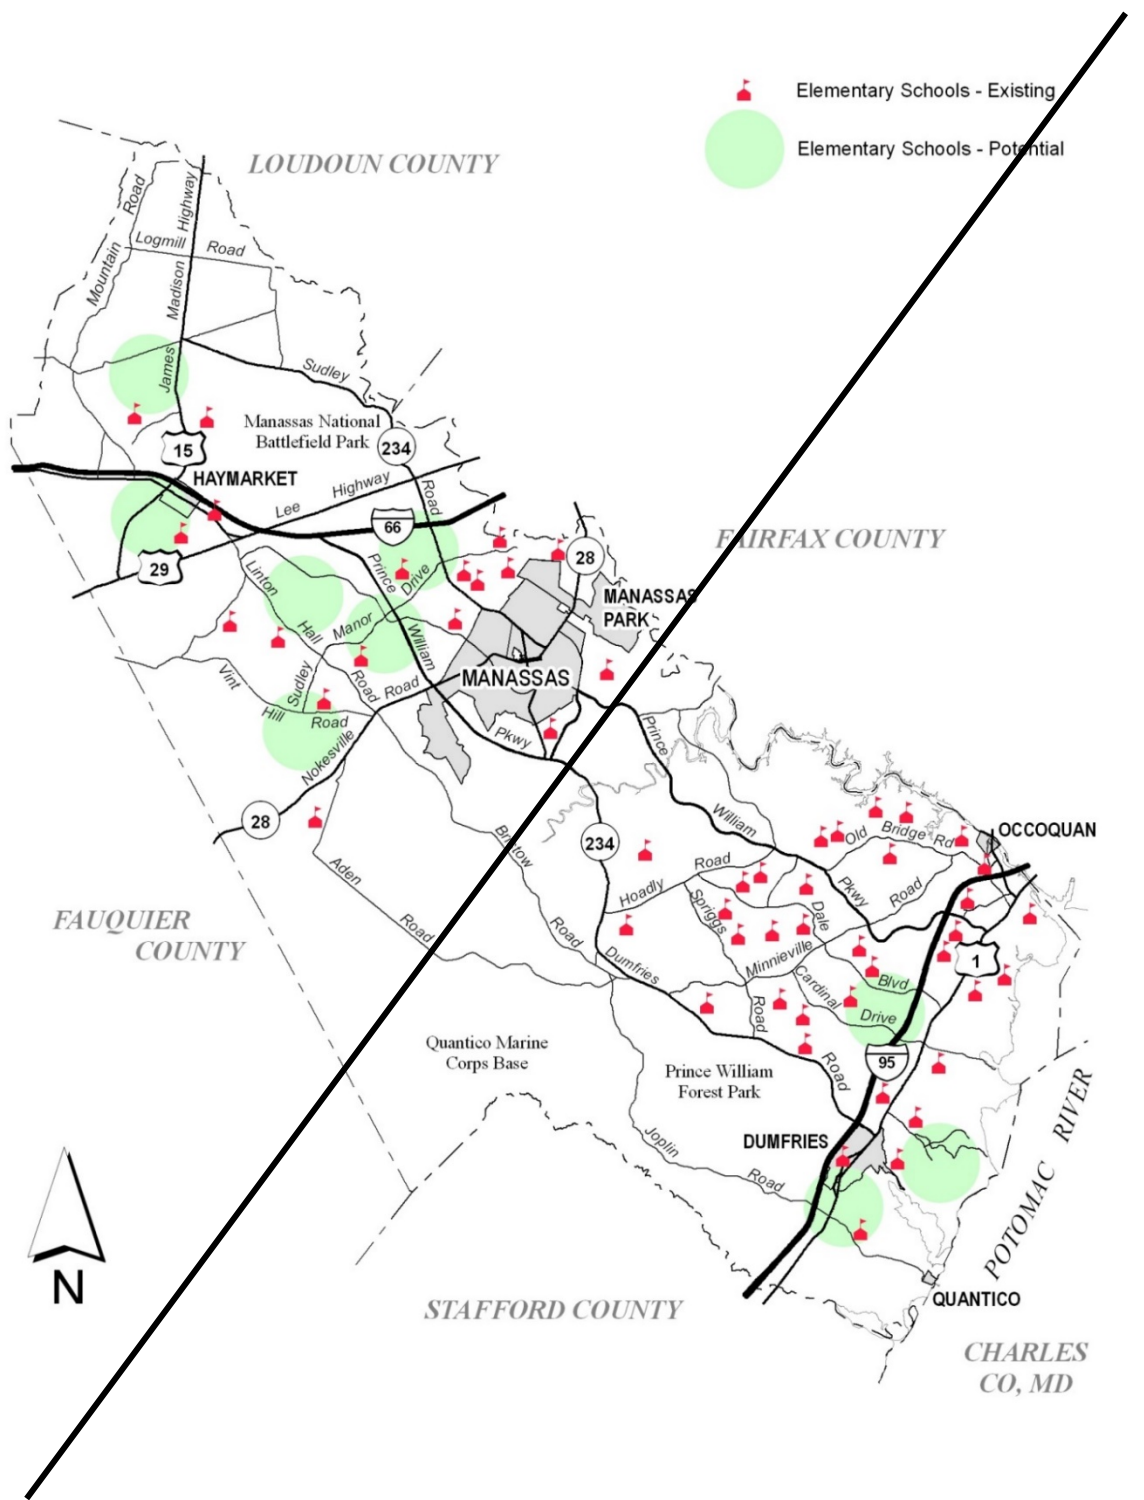

Proposed	Comments	Type	New Location
ED2.8.g Provide adequate student drop-off and stacking areas.			
◆ Design the associated school classrooms for a capacity of 24 kindergarten, 24 elementary, 21 middle, and 21 high school students.	Addressed by VA. Dept. of Education code requirements guidelines (PWCS).		
● Facility Incompatible:	Comments addressed in ED2.8.f and ED 3.2 (Planning)		
◆ Public Safety Facility ¹			
◆ Health Care Facility ¹			
● Site Incompatible:			
◆ Landfill			
◆ Prison			
◆ Public Safety Facility ¹			
◆ Health Care Facility ²			
◆ High voltage power lines			
¹ Public Safety Facilities include Police and Fire/ Rescue Stations			
² Health Care Facilities include Hospitals and Health Clinics			
● Outdoor Facilities Open Space:			
ED2.8.h On the school grounds provide outdoor facilities and open space, such as athletic and recreational playfields, school bus loading and unloading areas, parking, environmental study areas, and natural buffers as specifically listed in the Design and Construction Standards Manual (DCSM) for elementary schools, middle schools, and high schools and in conformance with the School Location/Design Criteria Criteria Preferences	Schools preference (Schools)		
ED-POLICY 3: Locate sites and facilities based on proximity to other schools and compatible public uses, in consideration of capacity standards, and the potential for expansion and future alternative uses of space.			
ACTION STRATEGIES:			
ED3.1 Acquire new sites and construct new facilities in order to best serve future needs when the Comprehensive Plan indicates a need for schools (see Table 2).			
ED3.2 Coordinate proposed school locations with other agencies, to consider shared use of sites and facilities.			
ED3.3 Collocate elementary and middle schools with parks, where feasible, to optimize the shared use of facilities.			

Proposed	Comments	Type	New Location
ED3.4 Develop school sites and construct school facilities according to the relevant policies and action strategies of the Community Design Plan.			
ED-POLICY 4: Promote alternative uses of space through joint occupancy and availability of community services and facilities.			
ACTION STRATEGIES:			
ED4.1 Utilize excess school space to the maximum community benefit during intervals of under-capacity operation at individual facilities, such as evenings and weekends, or when facilities are temporarily (such as in summer) or permanently closed. Possible uses include, but are not limited to, the following:			
ED4.1.a Special education programs			
ED4.1.b Educational research and development activities			
ED4.1.c Temporary day-care facilities			
ED4.1.d Other compatible public uses			
ED4.1.e Cooperative loan of space for civic, nonprofit or charitable use			
ED4.1.f Rent/lease of space			
ED4.1.g Community recreation			
ED4.2 Explore design changes for future or <u>renovated</u> remodeled school buildings that will facilitate alternate community uses, as described in AS-1 <u>ED 4.1</u> , above.	Clarification (PWCS)

¹ Elementary school capacity now reported as “Program Capacity”											
² Combined school capacity reported within both elementary and middle school capacity figures											
³ While planning capacity of a school facility provides an estimate of the number of students who can be housed in a school based on averaged education program need and staffing, the program capacity (881 Elementary Students) provides an estimate of the number of students who can be housed in an elementary school based on the specific educational program currently utilized at the school facility.											
ED Policy 5: Provide adequate opportunities and processes for public input during design and development stages of new school construction and/or expansion of existing schools.									ED Policy 5 is addressed by School Board Policy 810 which covers public input as well as Regulation 810-4 (PWCS)		
ACTION STRATEGIES:											
1. Encourage the School Board to adopt and implement a formal public input process for school construction and/or expansion projects.											
2. Encourage public participation in the School Board's process of gathering input on the construction of new schools, additions to existing schools and renewals of existing facilities.

APPENDIX A	Level of service standards will be re-evaluated independently at a later date (Planning)		
LEVEL OF SERVICE STANDARDS FOR PUBLIC SCHOOLS			
New development presents demands for countywide school facilities that impact the current levels of service provided by the public school system in Prince William County. It is important that the County provide both current and future residents adequate education services that meet current and future demand. The future residential demand for education programs and school facilities must be measured, and means must be identified for maintaining the established countywide level of service for public schools after new development occurs. Level of Service for schools is defined as no more than 100% utilization on a countywide-basis, number of students per classroom, and maximum number of students per school type. LOS standards include maintenance of student capacity (to prevent erosion of current service) and proportion of schools built compared to future projected needs as calculated in Table 1. Table 2 summarizes the basic site standards.			
Future school needs are projected by the Prince William School Board. The number of students forecast to be generated from the County population is computed, based on existing enrollment plus projected enrollment. Additional students are forecast by multiplying projected housing units by the appropriate student generation factor. A student generation factor is a multiplier used to calculate the number of students attending each school level (elementary, middle, and high), and it is based on the housing unit type (i.e., single-family detached, townhouse, or multifamily). All applications for a rezoning and/or special use permit for residential dwelling units shall contain the following information:			
<ul style="list-style-type: none">Number and type of dwelling units proposed.Anticipated occupancy date for proposed dwelling units.			
Where the proposed rezoning and/or special use permit application proposes dwelling units that may contain school-age children, the applicant shall be required to provide the following:			
<ul style="list-style-type: none">A statement from the Prince William County School System regarding the anticipated shortfall between existing and projected and already funded school facilities, and the school facility demand generated by the proposed residential development.Provision of an equitable contribution for school sites and facilities, at the LOS standards contained in the Policy Guide for Monetary Contributions.Provision of a school site at the LOS standards contained in the schools plan, so long as those sites and facilities are acceptable to the School Board.Or, a combination of a school site, acceptable to the School Board, and site development costs, and the monetary difference between the value of that school site, as determined by the School Board, and the total monetary contribution that would otherwise be provided, as above.			
Rezoning and/or special use permit applications that are found by the Prince William County School System to generate a shortfall between the new demand and existing and projected and already funded school facilities without committing to mitigation measures that are acceptable to the School System shall be found inconsistent with the Schools Plan.			
The methodology for determining equitable monetary contributions for new development is outlined in the <i>Policy Guide for Monetary Contributions, Prince William County Planning Office</i> .
