### G. W. HERRING FOR LEGISLATURE

George W. Herring, of Featherstone, this county, late today announced his candidacy for the House of Delegates, subject to the August 4 primary. The decision came only after the urgent demands of a large group of his friends who feel that he is the logical man to succeed Daniel M. Chichester, as the delegate from Prince William and Stafford counties in the State Legislature.

Mr. Herring is a native Virginian having been born in Orange, on December 30, 1877. He is well known in both counties which he will represent, if elected, and was a former clerk of the Court of Stafford and also served as a member of the Board of Supervisors of the same county. He has been a resident of Prince William for many years and maintains his family residence at Featherstone Farms, near Occoquan. He is thoroughly conversant with conditions in both counties as he is a frequent visitor in all sections of each of them in connection with his lumber interests.

He is a prominent businessman and farmer, is president of Wallace and Herring Lumber Company, and maintains and operates extensive farm lands at Featherstone. In addition to his activities in county affairs, including philanthropic organizations and civic associations, he is active in the social life of the community, a 32nd degree mason, and a member of numerous clubs.

"While I had not given any thought to becoming a candidate to the House of Delegates," said Mr. Herring today, "so many of my friends have urged me to do so, and have assured me of their support in the primary that I have felt it my duty to listen to them, hence my announcement as a candidate to succeed my good friend Daniel Chichester."

### VISITING IN MANASSAS

Mrs. H. C. Speake of Dumfries is the guest this week of her brother and sister-in-law, Mr. and Mrs. G. R. Ratcliffe.

### EFFORTS BEING MADE TO HAVE SOIL SURVEY OF PRINCE WILLIAM COUNTY MADE

If sufficient interest is shown by organizations and individuals of the county, it may be possible to have a soil survey of Prince William County made sometime in the future. According to George W. Paterson, in charge of Soil Survey Work, Blacksburg, counties will be selected according to the demand for the work and interest shown by the counties. Since three or four months time is necessary for the agronomy department to complete the mapping of a county, and the work has only been recently started, it might take several years for Prince William to be reached unless prompt local action is taken.

The survey would be of great value to our county and all organizations would be rendering a service by taking action on the matter and petitioning Mr. Paterson to include Prince William as one of the next counties to have a complete survey made of its soils by his department. It would also be well for individuals to write Mr. Paterson.

It is doubt if there is another county in Virginia having as great diversity of soil types and in which a soil survey is needed as badly as in Prince William.

This work would be done, should we be selected, without cost to the county or individuals.

ARTHUR S. BOATWRIGHT

### MANASSAS MAN OFFERS FOR DELEGATE

Arthur S. Boatwright, yesterday announced his candidacy for the General Assembly as delegate from Stafford and Prince William Counties.

Mr. Boatwright has been active in county affairs for the last ten years, having previously been connected with the State Highway Department and in private contract work on roads. He is a member of the Manassas Kiwanis Club and takes part in all public activities.

Mr. Boatwright is forty six years of age, having been born at Madisonville (Charlotte County) on January 21, 1885. At an early age both of his parents died, and he was reared by his uncles and aunts. He demonstrated self reliance in going into the world at the age of eighteen when he moved to Richmond and took up clerical work after securing some schooling.

While engaged in construction of roads, Mr. Boatwright further identified himself here by his marriage with Miss Alexander, a Prince William girl. He, therefore, adopted this county as a permanent home, and has spent a third of his natural life in aiding to upbuild its interests and in aiding in its development.

The political complex early appeared in Mr. Boatwright. He constantly attended sessions of the General Assembly during the hectic years of '10, '12 and '14, forming acquaintances with the outstanding leaders and members at that time. Owing to the character of the work and pursuits followed, he has come into contact with men of affairs and the public at large.

## KILLED BY HIS BROTHER

The story of how a bullet left 12 children fatherless with a bereaved mother was unraveled in the courthouse here Tuesday at the coroner's inquest into the death of Richard H. Duvall, 52, Virginia prohibition officer, who was shot dead Monday in Hoadly, south of Manassas.

E. G. Duvall, 55, the slain agent's brother, was ordered held under \$1,000 bond for action of the grand jury which will convene April 6, after it was decided that Richard H. Duvall died by a gunshot wound inflicted by his brother.

Last September, it was brought out, Mr. and Mrs. Richard Duvall separated, the husband remaining at their home in Hoadly and Mrs. Duvall going with her children to Arlington county to live with friends.

Since then reconciliation attempts had been made by her, according to testimony, but Duvall allegedly refused to have anything further to do with his wife, although willing to shelter and support the children, most of whom are not yet full grown.

Last Saturday Mrs. Duvall returned to Hoadly with several of their children to try once more to patch up their domestic differences. The prohibition officer, became abusive, she said, and she took her brood to the brother's home nearby for refuge.

Discovering their whereabouts early Monday night the husband left for his brother's house. The men both of whom were armed according to testimony offered at the inquest met on a highway. Each apparently was aware of the other's intentions.

### MAN CAN'T SLEEP, GETS NERVOUS, HATES PEOPLE

"I could not sleep and got so nervous I hated everybody. Since taking Vinol, I can sleep 10 hours and feel full of pep all day."—Julius Bender. For 30 years doctors have prescribed Vinol because it contains important mineral elements of iron, calcium and cod liver peptone. The very FIRST bottle brings sound sleep and a BIG appetite. Nervous, worn-out people are surprised how QUICK Vinol gives new life and pep! Tastes delicious.

## The Word of God

BIBLE THOUGHT AND PRAYER

If parents will have their children memorize a Bible selection each week, it will prove a priceless heritage to them in after years.

**PERFECT GUIDANCE**—Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge him, and he shall direct thy paths.—Prov. 3:5, 6.

## PRAYER:

Lord, may we hear Thee calling, "Follow me," and may we have grace to respond to Thy call.

## WHY IS IT?

"A man wakes up in the morning after sleeping under an advertised blanket on an advertised mattress and pulls off advertised pajamas; takes a bath in an advertised tub; shaves with an advertised razor, washes with advertised soap; powders his face with advertised powder; dons advertised underwear, hose, shirt, collar, shoes, suit, handkerchief; sits down to breakfast of advertised cereal; drinks a cup of advertised coffee, puts on an advertised hat, lights an advertised cigar; rides to his office in an advertised auto on advertised tires; then he refuses to advertise on the ground that advertising doesn't pay? If your business isn't good enough to advertise, advertise it for sale."

## LESS RADIO ADVERTISING

The Canadian Association of Broadcasters the other day agreed to eliminate all advertising from Sunday radio programs. Mention of the sponsor's name will be permitted, together with the address and the nature of the business or product. Lengthy advertising talks will be banned.

This action appeals to American radio users. Doses of advertising on radio programs are often too large to be pleasant. Until some other way is found to pay for radio entertainment, advertising of some sort will continue, but it should be kept down to reasonable proportions. If there is too much of it, listeners soon learn to tune out until the entertainment feature is resumed. It is to the advertisers' advantage as well as the listeners' to solve this problem of proportion.—Alexandria Gazette.

## CONGRESSIONAL LAST DAYS

Calvin Coolidge, newspaper columnist, reveals his sense of humor in a neat little piece razzing Congress. He notes the "nervous exhaustion" which is normal with Congress near the end of a short session. He observes that the House makes a fuss about a committee spending 50 cents for a corkscrew and then passes, by a huge majority, a bill paying war veterans half a billion to a billion dollars.

That, he adds, was to be expected. "It is part of the war. The cost of the conflict will go on for generations." Which, as the country dimly realizes, but will realize more clearly hereafter, is no joke. Computations made by experts, on the basis of historical records, indicate that we shall be paying bonuses and pensions on World War accounts for more than a century yet.

And that, we may add, is probably all right. In a way, the more we have to pay, and the quicker, the better it will be for us. We may know better, then, than to let ourselves get into another war.

Just make bonuses and pensions high enough in every country where anything of the military spirit survives, and taxpayers may be trusted to go pacifist.—Alexandria Gazette.

## ANNOUNCEMENT

## To the Voters of Prince William County:

Being urged by many friends throughout the County, I have decided to be a candidate for the office of Commissioner of Revenue again this year for which office I was a candidate four years ago, being defeated by only two votes.

Now, I believe that most of the people in the County think that I am entitled to the office this time. I am farming a small place at Canova.

I was born and raised about 4 miles from where I live now.

Voters and friends, I have to work and I may not be able to see every one of you before Election Day but hope to see all I can and if I should not please think over this matter before casting your ballot.

Now, if the people should honor me with the office, I shall do my best to accommodate the public in every way I can, and if it be the law that the taxpayers have to meet the Commissioner at some public place to make their tax returns, I shall do the best I can to have some private room for them to meet in and to make the places as convenient as I can for them, and if there are any one that would not be able to come out I will be only too glad to go and see them.

I sincerely trust that you will honor me with your support at the August Primary.

T. M. RUSSELL

## CLOVER FAILURES MAY BE CONTROLLED

Clover failures in Virginia are usually due to one or more of the following causes: deficiency in lime, or plant food (fertilizer), poor preparation of seed bed, using seed of poor quality, or the wrong kind of seed; or the season.

All of these may be more or less controlled, except the season; and the preparation of the seed bed will have a big influence on the moisture present during the early growing season.

The subject under consideration here is the best kind of clover seed to use. The seed should be free of noxious weeds, of high purity and germination, with a low percent of hard seed; and free from and resistant to disease, especially anthracnose.

Anthracnose resistant seed from the following states have given the best results both at experiment stations and under field conditions: Virginia, Tennessee, Ohio, Maryland and Michigan.

Seed from other sources very often give a good crop the first year, but a very short crop, or no crop at all, the second year. This is due largely to anthracnose killing the plants before the end of the second year. Thus it is very important to sow anthracnose resistant seed.

## Seeding Clover in the Spring

The best method of seeding clover in the spring is to sow the seed on fall sown small grain or with spring oats. Eight or ten pounds of seed per acre will usually give a full stand if other conditions are favorable. The usual date of seeding is from March 15 to April 10. On good land which received an application of phosphate when the wheat was seeded, 200 lbs. of superphosphate (16 per cent or 20 per cent acid phosphate) will usually be all the fertilizer that is needed. In this case, if the clover seed is sown with a wheat drill, it is advisable to mix the seed with the phosphate and sow together. On tinner land it will be found profitable to use 200 to 400 pounds of a 4-16-4 or 2-12-2 fertilizer per acre instead of the superphosphate. The seed should not be mixed with these last two fertilizers, because of probable injury to the germination. When seeding clover with a drill, it should be sown across the grain rows.

No amount or kind of fertilizer will insure a good stand of clover if the soil needs lime.

Is It Necessary to Lime and Inoculate Clover and Alfalfa?

There are a few legumes like lespedeza and cowpeas which grow

successfully without lime or inoculation, but better results are usually obtained when liming and inoculating are practiced. It is essential to use lime on over 90 per cent of the soils in the state to grow maximum crops of clover. It is not absolutely essential to inoculate clover, but better results are usually had where inoculating is resorted to. However, with alfalfa and sweet clover, it is not only essential to both lime and inoculate, but it is an invitation to failure not to do so. While one to two tons of ground limestone or its equivalent will usually be sufficient for clover, two to four tons are needed for alfalfa or sweet clover. It is also advisable to apply the lime several months before sowing the seed. When this cannot be done, 400 or 500 pounds of lime should be sown in direct contact with the seed. Good inoculation may be gotten by using either soil from a field where the crop in question is being grown successfully, or by using a commercial culture. However, the first time alfalfa or sweet clover are sown on a field, both the soil and commercial culture should be used. This is good insurance and costs very little, as the price of enough commercial culture to treat a bushel of seed ranges from 60c to \$1.00. The soil method costs nothing if a good stand of the crop in question is nearby, except the trouble of getting the soil and treating the seed. A gallon bucket of soil will treat as much seed as most any grower sows. Directions for using the commercial culture comes with it, and your county agent will explain how to apply the soil culture.

## AGRICULTURAL NOTES

The District Basketball Tournament was held at Upperville January 21, 1931.

The following schools completed in the tournament: Manassas, Nokesville, Marshall, Herndon, Oakton, Bealton, Calverton and Upperville.

All the games were well played. Manassas lost to Herndon in the final game, but came out second place.

John Pattie, James Cooke, John DeBell and Billy Yates represented the Agricultural Department at the State Corn and Grain Show which was held at Harrisonburg, January 26 and 27.

The boys had an enjoyable time and visited the Luray Caverns while on their return.

Herbert Wilson, John Pattie and Arthur Carter have been recommended by the Manassas Club as candidates for the Planters Degree which is the highest honor which can come to any student in Vocational Agriculture. It is to be remembered that Ralph Beahm, a former graduate of the Manassas Agricultural Department, who had distinction of being given the Planters Degree by the State Board of Education.

It is hoped that the three above members will be successful in attaining the much sought for and honored distinction (Planters Degree).

Sidney Lawler, a former graduate of the Department, and now a senior at the University of Maryland will start his practice teaching at Manassas and Nokesville under direction of Mr. J. P. Pullen. Lawler is one of the outstanding members of the F. F. V. Club of Manassas.

The State Agricultural Rally for Future Farmers will be held in June. The Manassas Club is now making arrangements to have a judging team there. Two of the boys who won the cup at Marshall last year will be eligible to compete at Blacksburg Rally this year. Manassas should be able to give a good account of herself.

FORD  
COMFORT

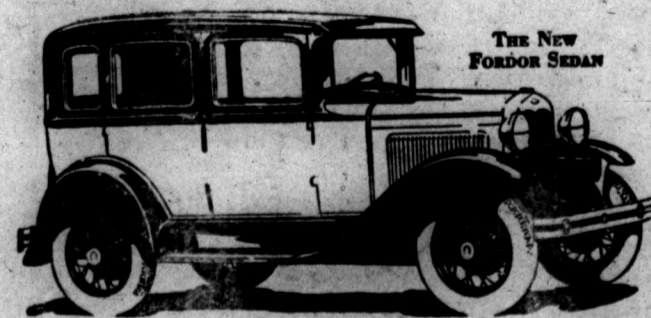

**Every new Ford is equipped with  
four Houdaille double-acting  
hydraulic shock absorbers**

ONE of the fine things about driving the new Ford is the way it takes you over the miles without strain or fatigue. No matter how long the trip, you know it will bring you safely, quickly, comfortably to the journey's end.

The seats are generously wide, deeply cushioned and carefully designed to conform to the curves of the body. Every new Ford has specially designed springs and four Houdaille double-acting hydraulic shock absorbers. These work both ways — up and down. They absorb the force of road shocks and also provide a cushion against the rebound of the springs.

Other features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, more than twenty ball and roller bearings, extensive use of fine steel forgings, aluminum pistons, chrome silicon alloy valves, torque-tube drive, Rustless Steel and unusual accuracy in manufacturing.

In addition, you save many dollars because of the low first cost of the new Ford, low cost of operation and up-keep, and low yearly depreciation.

## APPRECIATION

A good-bye kiss is a little thing,  
With your hand on the door to go,  
But it takes the venom out of the sting  
Of a thoughtless word or a cruel fling  
That you made an hour ago.  
A kiss of greeting is sweet and rare  
After the toll of the day,  
And it smooths the furrows ploughed  
By care.

The lines on the forehead you once  
called fair,  
In the years that have flown away,  
Tis a little thing to say, "You are  
kind,

I love you, my dear," each night,  
But it sends a thrill through the  
heart, I find;

For love is tender, as love is blind,  
As we climb life's rugged height,  
We starve each other for love's caress  
We take but we do not give;

seems so easy some soul to bless,  
But we dole the love grudgingly, less  
and less,

Till 'tis bitter and hard to live.  
—Anonymous.

## MCGUNIGAL BROADCASTS

## OVER WMAL SATURDAY

How he rescued an unconscious observer from a storm tossed balloon run up from the deck of the convoy cruiser Huntington in the war zone in 1917, is to be related this week when Patrick McGunigal, Medal of Honor man, is heard in the "Chevrolet Chronicles" hour over WMAL on Saturday, February 28, at 7:30 p. m.

The balloon, on submarine lookout duty, was 500 feet above the deck of the cruiser, when a sudden storm struck it, ripped loose one of four supporting ropes and hammered the crazily tossing bag repeatedly into the mast and against the masts of the cruiser, while the observer was trapped in the basket by a maze of snarled ropes.

When the shapeless mass came close to the deck McGunigal leaped into the tangle of ropes and, although 'tossed high in the air again, succeeded in holding fast to the observer, extricating him from the ropes and

putting a bowline around him so that he could be pulled to safety. For his heroic deed McGunigal, who resides at Montauk, N. Y., won the Medal of Honor, highest government award for naval men. He also was awarded the War Cross of Italy.

Frazier Hunt, international journalistic figure, will interview McGunigal for the radio audience.

## Who Drew That?

Somebody's scrawled a line up there just where we were going to write an ad about A & P. Come on now, who did it?

Oh... that's different. You say the line shows how fast the retail price of food has been going down? So it does. And it's taken quite a slide, hasn't it? Down to about 15% lower than it was in September, 1929, according to the Bureau of Labor Statistics.

Better not erase it then; because A & P had more to do with the drawing of that line than anybody else in the United States. For, as growers and producers have reduced their prices, A & P has reduced the price of food in its stores.

We'll just write the ad way down here in a little bit of space. A & P is the strongest influence in the country for keeping the price of food in the consumer low.

## LOCAL DEALER IS ENCOURAGED

### Cites Facts and Figures to Substantiate Assertion

More than ever convinced that 1931 will be a good business year for those who are determined to make it so Mr. F. R. Hynson, local Frigidaire dealer has returned from a spring business conference at Norfolk, where various topics relating to his business were discussed by factory representatives from Dayton, Ohio.

"Compared with certain other sections of the United States, conditions in this territory are very good, and as a result we are expecting to sell many more Frigidaires during 1931 than we did last year, which was an exceptionally good one," Mr. Hynson said.

"Now that we are coming out of the doldrums that followed the deflation period, people are thinking more sensibly and are putting health ahead of wealth. The electric refrigerator has become more and more a necessity, now that there are more than 2,500,000 in use and people everywhere are becoming better acquainted with its advantages.

### PRINCE WILLIAM COUNTY 4-H CLUB COUNCIL ORGANIZED

#### Plans Laid for Work in 1931

The officials and leaders of the county 4-H Club met at the Parish Hall in Manassas on Saturday, February 21 to organize a Club Council. The clubs were well represented by a group of interested members.

The morning session opened at 10:30 a. m. Mrs. Illingworth, a County music booster, gave a very interesting and inspirational talk on the subject "Why Leadership and Song is Important." Many helpful suggestions, necessary in club work, were derived from her talk.

Miss Hallie Hughes, State Girls Club agent from Blacksburg, was with us and we were proud indeed to have her. She spoke on the work that has and is being done and helped in the organization of the group. She also explained the duty and purpose of the County Council.

Mr. R. C. Haydon, Superintendent of Schools, gave a fitting talk on "Organization." He explained the ways and means of organization and told how to work in and with an organized group.

The morning session closed and the lunch hour was enjoyed by all. The lunch was served in picnic style.

After a recreational hour the afternoon session opened at 1 p. m. The afternoon was taken up in organization and making plans for the year.

First we elected officers, Miss Hughes taking charge until the group elected a president who immediately took charge.

The following officers were elected: president—Janet Russell, Occoquan club; vice president—Mary Harrover, Manassas club; second vice president—Wiley Garman, Nokesville club; 3rd vice president—Tom Tyler, Haymarket club; secretary and treasurer—Wilda Bourn, Occoquan club; song—Hazel Bowman, Nokesville club; cheer leader—Stuart McMichael, Nokesville club and reporter—Geraldine Shepherd, Nokesville club.

After the election of officers Miss Pitts, County Home Demonstration agent, read and explained a plan of work that had been mapped out by her, Miss Hughes and Mr. F. D. Cox, County agent.

After due explanation and discussion the plans were adopted by the group.

The following plans were adopted.

1. Each club make a plan of work.
2. Each club make and use a 4-H year book.

Each club work for 100 per cent of completion of projects.

Each club be responsible for securing and submitting 100 per cent of year books to agents at end of year.

Each club entertain another club at a joint meeting.

Each club have a community project.

Each club be responsible for getting club officers and leaders to club and leaders meetings.

Each club have representatives at District and State Short courses.

Each club have an Achievement program to which the community is specially invited.

Each club take part in the county 4-H Achievement Day in the fall (90 per cent attendance).

Each club enter contests at county 4-H Rally to be held in connection with county picnic.

Have at least 2 dairy judging teams at the State Short course.

Have 4-H club work represented at the Dairy Festival in October.

Miss Hughes explained the making and using of the 4-H year book.

The meeting then adjourned until the next meeting.

Geraldine Shepherd, reporter.

CHEVROLET

The New Chevrolet Sport Coupe—Product of General Motors

72% of all Chevrolets  
are still in use

During the past 20 years the American public has purchased 4,883,865 Chevrolet cars. Seventy-two per cent of these—3,511,651—are still in active service! Such a record demonstrates the soundness of Chevrolet's policy of building the very best car possible for the price. This policy has brought many important benefits to the buyers of low-priced cars,

and these benefits find even fuller and finer expression in the Chevrolet Six of today.
