

## Christian Overseas Program Now Winding Up in Manassas With Incomplete Returns Good

Commodities  
To Be Sold  
November 8, 12

Christian Rural Overseas  
Program is winding up its canvass  
in Manassas and Brentsville dis-

tricts. Complete returns show a good  
response with the entire state keep-  
ing pace with other agricultural  
districts in the organizational drive  
to raise money for overseas  
commodities for the needy through its pro-

gram. Commodities to be sold  
according to Wilmer Kline,  
county chairman, farm commodi-  
ties will be placed on sale by C. R.  
O. P. on November 8 and 12.

Stock will be sold at the Ma-  
nassas Livestock Market on No-  
vember 8, while poultry and other  
farm products will be sold on the  
12th. Details of the drive will be  
arranged by the county com-  
modities committee, consisting of  
J. H. Eagle, chairman; Les-  
lie Hurst and Wilmer Kline.

Plans to Convert Products  
One of the sales is to con-  
vert products given to C. R.  
into either corn or dried milk.  
Each of these has been set as a  
goal of the county's goal.  
Kiwans Club at Occoquan  
adopted the C. R. O. P. can-  
didate that district as a club  
and it is getting under way  
with Glimmer Garber as  
chairman.

## M. Kline Elected to Head Milk Producers

Over 100 members and guests  
present at the meeting last  
night of the Prince William  
County Milk Producers  
Association held in the dining room  
of the Nokesville Fire House.

Members were elected and a report  
on the market outlook for  
milk was given.  
Following the election of officers  
William F. Hale, president;  
Frank Cox, secretary, and  
other officers of the association  
for the past year and the  
outlook for the future was  
given by the association's manager,  
B. Derrick.

Outlook Favorable  
Hale stated that the population  
of Metropolitan Washington had  
increased since 1930 and that the  
increasing growth in num-  
ber of consumers in the area served  
by the Washington  
area would call for more and  
milk in the years to come.

On the part of the asso-  
ciation and associated agencies to  
supply an increased per capita  
consumption of milk and dairy  
products were cited by Manager  
Derrick who said that hundreds of  
dairy farms were taken over  
by the government to observe  
highly sanitary conditions un-  
der which milk is produced in this  
area.

William F. Hale, in behalf of the  
county 4-H and FA Dairy Show  
committee, thanked the association  
members and members for the  
cooperation given with the recent  
show. Enthusiastic appreci-  
ation of the excellent dinner  
served by the Kensington club was  
expressed by all present.

## Miss Sue Ayres Outlines Red Cross Program

Miss Sue Ayres, Junior Red  
Cross chairman for the Prince  
William County Red Cross chap-  
ter, yesterday outlined programs  
planned for the 4,137 members of  
the world-wide organization now  
holding their annual enrolment  
campaign in nine Prince William  
County schools.

"This year," Miss Ayres said,  
"the American Junior Red Cross  
is concentrating even more of its  
energies in working toward world  
peace and international under-  
standing, though, of course, it will  
continue its program of national  
and community service."

Discussing New Program  
In addition to exchanging col-  
laboration albums and school art  
with children of other nations,  
Junior Red Cross members are dis-  
cussing a new program of sending  
recordings of school music to  
schools abroad. They will continue  
to make contributions to the Na-  
tional Children's Fund and pre-  
pare gift boxes for children over-  
seas, Miss Ayres said. The goal  
for Prince William County schools  
is 180 gift boxes, she added.

The chairman pointed out that  
this year's program calls for in-  
creased Junior Red Cross services  
to the community. Children's hos-  
pitals, homes for the aged, and  
veterans hospitals will receive com-  
fort items, games, and scrapbooks,  
as well as personal services and  
entertainment from Junior Red  
Cross members. These are being  
worked out by the different schools.

The nondescript fruit or veg-  
etable which was left in The Jour-  
nal office some time ago is a  
fruit, Cucurbita moschata—better  
known as a cushaw, and it is a  
"double cushaw."

It was brought into our office  
from the farm of Charles Croft-  
shorn, near Nokesville, by Hunton  
Tiffany, and can be seen in our  
window.

## Voters Go to Polls Tuesday To Decide Vote Amendments; Charges Center on Vagueness

### C. C. Cloe Dem. Chairman Favors Change

C. C. Cloe, chairman of the Coun-  
ty Democratic Committee, favors  
the proposed change and wrote a  
letter for The Journal giving his  
explanation of what the proposed  
amendments involve.

According to Mr. Cloe:  
"The fact that this amendment  
would do away with the revenue  
derived from the poll tax is  
thought that the legislature would  
be prevailed upon to pass some law  
to supply the School Fund with this  
lost revenue. So, in this proposed  
law there has been set up a maxi-  
mum amount that the legislature  
can make legal for this purpose and  
that amount is \$3.00.

Three Dollar Limitation  
"This proposed law does not say  
that you will have to pay \$3.00 per  
year, but does make this a limit  
should it be required.

"For your information the leg-  
islature at the present time can  
pass a law to make this figure any  
amount that they may desire and  
you would have no recourse.

"Please understand that whatever  
is done with regard to the proposed  
amount of tax to take the place of  
the \$1.50 poll tax for the School  
Fund, it has nothing at all to do  
with your qualifications to vote.

"When the poll tax is discon-  
tinued either by the state of Fed-  
eral Government, it is likely that  
a tax of some amount will be sub-  
stituted; but this is separate and  
distinct and has nothing whatever  
to do with your qualifications to  
vote.

"Do not believe anyone who tells  
you that you would have to register  
each year, or that you would have  
to pay \$3.00, or any other amount  
in order to vote, because it is not  
the truth.

"The information brought out in  
this article is from statements made  
by the Attorney General of the  
State of Virginia, and as he is the  
highest legal authority in the  
state ...

"I would like to have you bear  
in mind that this is not a campaign  
issue, although I am very strongly  
in favor of it."

## Seal Chairman Position Filled

Mrs. Paul Espenshade of Manassas  
has accepted the chairmanship  
of the 1949 Christmas Seal sale in  
Prince William County, it was an-  
nounced this week by Jack F. Fick,  
Jr., president of the County Tu-  
berculosis Association which spon-  
sors the annual sale.

Mrs. Espenshade succeeds Mrs.  
Frank D. Cox who has served as  
county chairman for the past eight  
years, during which time returns  
from the annual seal sales increased  
from less than \$800 to \$2,500, reai-  
zed from last year's drive for funds.

Only Means of Support  
The sale, conducted through the  
Christmas season, is the only means  
of support for the work of the Tu-  
berculosis Association carried on  
continuously during the year. Main  
projects of the organization include  
case finding, clinics, dental and hot  
lunch projects, rehabilitation,  
health education, and home and  
sanatorium care for patients.

This year's campaign will start  
November 21 and district chairmen  
will be announced by Mrs. Espen-  
shade next week. Supplies have al-  
ready arrived and will be distrib-  
uted in time for the volunteer work-

## County Demonstration Clubs Observe Achievement Program

The 15 H. D. Clubs in the  
County held their annual Achiev-  
ement Day program at Nokesville  
Brethren Church last Thursday,  
October 27.

More than 100 women from all  
parts of the County attended to  
hear a most interesting program  
and enjoy a delightful lunch pre-  
pared and served by the Ladies  
Aid of the local church.

Miss Slocum Speaks  
Miss Sylvia Slocum, retired Dis-  
trict Home Demonstration agent  
from Richmond, gave a most in-  
teresting talk on "History of Home  
Demonstration Work in Virginia,"  
how it grew from tomato clubs  
in two counties in 1917 through  
canning clubs and to Home Dem-  
onstration groups.

Miss Emily Johnson from this  
County was the first tomato club  
leader and was followed by Miss  
Lillian Gilbert and others. She  
told how their women's work of  
Extension Service had progressed  
and is now in 96 counties of the  
state. She praised H. D. women  
for the work they have done and  
showed how much the organization  
can still grow to serve all people.

Brief Summary Given  
Mrs. Egbert Thompson, presi-  
dent of Woodbridge H. D. Club,  
gave a brief summary of H. D.  
work in this county, naming all  
the agents who have worked here.  
That is the only club which has  
kept a scrapbook of their club ac-  
tivities since it was organized.

Miss Kline, H. D. agent, reported  
on accomplishments of club mem-  
bers during the year. She com-

### C. C. Cloe States Poll Tax Expected Illegal Next Year

With election day this coming  
Tuesday, November 8, voters are  
still in doubt as to what the pro-  
posed amendments actually involve.

General charges by opponents of  
the proposed amendments to the  
State Constitution center around  
what is believed to be the vagueness  
of the proposed change and the  
facts or beliefs that there would  
be no great change, except for the  
possibility of leaving open to the  
prudence of the legislature the pow-  
er to disenfranchise some present  
voters.

### Poll Tax to Be Illegal

According to C. C. Cloe, chairman  
of the County Democratic Commit-  
tee, a bill making the poll tax il-  
legal has already passed the House  
and it is the first thing on the Sen-  
ate agenda to come up when Con-  
gress reconvenes. In other words,  
there is the possibility that a Fed-  
eral law would outlaw the poll tax.

Mr. Cloe states that it is con-  
ceded by most Congressmen that  
the poll tax law will be made il-  
legal this coming year and that a  
predicament would be precipitated.  
"To avoid this predicament," Mr.  
Cloe says, "this amendment has  
been prepared and passed by the  
Virginia State Legislature at the  
last two sessions, and voters are  
asked to vote for or against the  
proposed amendment.

"Should this amendment be car-  
ried and made law, the present  
poll tax law would automatically be  
discontinued and voters would have  
three ways of qualifying to vote  
in any and all elections."

Three Qualifications  
Mr. Cloe states that the three  
ways for persons to qualify for  
voting would be:

ONE—Voters would have to reg-  
ister 120 days prior to the gen-  
eral election. (At present voters have  
to pay their poll tax six months prior  
to the general election.)

TWO—Anyone having voted in  
the last previous general election  
would be qualified.

THREE—By having paid person-  
al property taxes on or before the  
due date which is December 5.

He adds that it is not necessary  
for a voter to do all the three ways  
mentioned but that any one of them  
will qualify a person for voting.

## To The Homemaker

Apples are the most plentiful fruit at this time of year and will be especially bountiful from October 27th to November 5th. This year's commercial apple crop is estimated at 132,126,000 bushels. This is about 21,000,000 bushels above the 10-year average.

Here are some tested and proven recipes from the Bureau of Human Nutrition and Home Economics. By using them you can vary the ways in which you serve apples.

**Apple Turnovers**  
Roll out pastry dough into rounds about the size of a large saucer. On half of the pastry round, arrange layers of thinly sliced apples, sprinkle with a mixture of sugar, cinnamon and a little salt, and dot with fat. Then moisten the lower rim of the pastry, bring the other part over it, press the two edges firmly together with the tines of a fork, and prick the top crust so the steam can escape. Bake at 375 to 400 degrees Fahrenheit for 20 minutes, or until the apples are tender.

## Apple-Cranberry Relish

1 apple, pared and cored  
2 cups cranberries  
1 orange  
Sweetening to taste  
Put the apple and cranberries through a food chopper. Quarter the orange, remove seeds, and put through chopper. Add sweetening (about 3-4 cup of sugar and 3-4 cup of corn sirup or maple sirup or honey, or to taste), blend and chill. Makes 2-4 quart of relish.

## Cider Gelatin Salad

2 tablespoons gelatin  
2-1/2 cups clear cider  
1-1/2 cup chopped apples  
1-2 cup finely chopped celery  
1-4 teaspoon salt  
1 tablespoon finely chopped parsley or green pepper  
1-4 cup chopped nuts  
Soak the gelatin in 1-2 cup of the cold cider. Heat the remainder of the cider to the boiling point, pour into the gelatin, stir until dissolved, strain, and chill. When the gelatin mixture begins to set, stir in the other ingredients, and pour into individual molds that have been rinsed in cold water. When set, turn out on salad greens and serve with salad dressing. Crackers sprinkled with grated cheese and toasted or especially well with apple salad.

## Big Six Split Week's Games

WILLIAMSBURG.—The Big Six had an even-split last week end with three losses and three wins recorded by Old Dominion eleven. William and Mary, Virginia, and Washington and Lee all came out on top, while Richmond, VPI and VMI suffered losses.

The slate for the coming week end provides Virginia fans with two of the nation's most important contests. The William and Mary Indians face the great North Carolina Tar Heels and the Cavaliers from Charlottesville travel to meet Penn's Quakers. Both Carolina and Penn felt the sting of defeat last Saturday at the hands of Tennessee and Pittsburgh.

**Good Games Expected**  
But Coaches Art Guepe and R. N. McCray, of Virginia and William and Mary, know that when teams of the calibre of Penn and Carolina lose they are just twice as tough the following week. All eyes will be watching the outcome of these two important ball games.

Elsewhere in the Old Dominion next Saturday VMI meets Davidson, Richmond faces N. C. State, and W&L tangles with victory-starved VPI. All three of these games are going to be squeakers with W&L, N. C. State and VMI rated as slight, very slight, favorites.

It's about time to give serious attention to the completion of all business scheduled for 1949. It might save a lot of wear and tear to let the underprivileged run the world for a decade or two. World surgeons vote to readmit German, Japanese colleagues.

Some of your neighbors have found that it is good business to have us check over and repair Corn Harvesters before they are dismantled from the tractor. Here are good reasons for having it done this fall:

1. Your machine comes back to you clean and fully protected with rust preventive for winter storage.
2. You are sure of having everything ready to go when you need it next year.
3. Once it is stored, you can leave it there until you are ready to pick corn again.

Drive in your tractor with the Corn Harvester on it, or phone and we'll come to your farm and pick it up.

## Horse Sale To Be Monday

One of the most important dispersals of thoroughbred breeding stock to be held in this section since the late Willis Sharpe Kilmer's stud was sold, nearly a decade ago, will be held on Monday, when the entire nursery of Justin Funkhousers O'Sullivan Farms will be auctioned at the farm near Charles Town, W. Va.

**Almost 50 Head**  
Almost 50 head of royally bred mares and weanlings will go under the hammer of Auctioneer George Swinebroad. The bloodlines stem from Sir Gallahad III, Tourbillon, Blenheim II, Pilate and other fashionable strains. The sale will be held in the enclosed pavilion on the farm, that seats nearly 2,000, and a barbecue luncheon will be served before the proceedings that start at 1:30 p.m.

Business pressure and the imminent retirement of his father from their numerous industrial holdings

is the reason young Mr. Funkhouser is retiring from the breeding division of the thoroughbred industry. He will continue to race a modest stable which will be trained by Frank Gall, the current farm manager.

There are some newspapers which rely upon the columnists for their opinions.

## CUSTOMER'S CORNER

Question: Does your A&P give you good food at low prices?

Answer: Yes. That is why millions of American families do their food shopping at A&P.

Question: Is A&P a monopoly?

Answer: No. We do only a small share of the nation's food business... a smaller share than we did 10 years ago.

Question: Does A&P drive competitors out of business?

Answer: No. We have more competitors today than we had 10 years ago and many of our good competitors have publicly advertised their willingness and ability to compete with us.

Why, then, do the anti-trust lawyers want to put your A&P out of business?

## Grade 'A' Milk Has Strict Requirements

The high excellence of milk produced in what is known as the Washington milkshed by Prince William and other dairy farmers of the Maryland and Virginia Milk Producers Association is reflected in the low mortality rate in the District of Columbia.

Good milk cannot be taken for granted and perhaps too few consumers give enough thought to the constant vigilance necessary to produce what is known as Grade A milk meeting District of Columbia Health Department requirements.

**Requirements Given**  
Briefly, here are the major requirements for such production:

The cows must pass a yearly test for T. B.

Dairy barns must provide adequate light and ventilation, and regulations require at least four square feet of light and six hundred feet of air space per stall.

Floors must be of non-absorbent material, and walls and ceilings must be smooth and kept clean and in good repair.

The milk house must also have non-absorbent material for the floors, with smooth walls and ceilings. It must be kept clean and ventilated and properly lighted.

**Must Have Boiler**  
Facilities for adequately washing utensils with hot water, and sterilization with live steam at 180 degrees must be provided. Each farm must have a steam boiler and sterilizing equipment for this purpose.

Water supply must be clean, sufficient and safe.

Approved types of utensils must be used in the handling of milk, and be kept clean, and stored in a sanitary manner.

Udders and flanks must be clipped regularly, and udders must be washed and dried, with separate clean cloths at the time of milking.

Convenient hand washing facilities must be provided for employees. Immediately after milking, milk is removed from the barn to the dairy house and cooled to below 50 degrees Fahrenheit and stored at below 50 degrees. Mechanical refrigeration units are provided on each farm for the purpose.

**Employees Examined**  
Refrigerated transportation must

be provided in hauling the milk from the farm to point of distribution.

Employees coming in contact with the milk or cows must be regularly examined by a licensed physician and found free of communicable diseases.

Adherence to such practical and accepted dairy farm practices produce the Grade A milk meeting District of Columbia health department requirements for which this section is famous and which is responsible for the splendid state of health of the Nation's capital and its environs.

**GOOD RECORDS ARE MEANT TO BE BEATEN**

★ The infantile death rate in the United States is very low. From 1934 to 1936 we ranked seventh in the world, led only by New Zealand, Holland, Australia, Norway, Switzerland, and Sweden.

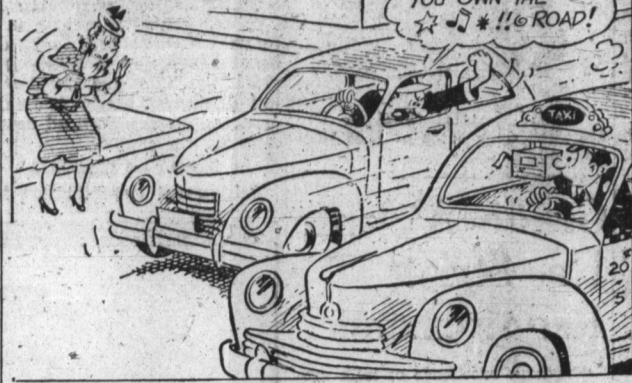

Yet 70,000 infants die annually in the first month of life, and 53,000 more from the second to the twelfth month. How many of these precious infants might have lived had their mothers had adequate prenatal care under the direction of a competent physician?

It is now up to the mothers to take advantage of the knowledge and skill of the physician during the trying months of pregnancy. We are ready to supply the needed dietary supplements and other medication ordered by your physician.

Final score in the game last week was 25-6.

On November 11, Osborn will play Falmouth, and on November 18, Strasburg. Both games will be played here, and the game with Strasburg will be the homecoming game, with a parade and other plans being made.

## Rail oddities

THE LIVE OAK BAPTIST CHURCH IS SITUATED IN A RAILROAD FREIGHT YARD IN NEW ORLEANS. IT IS BUILT OF LUMBER FROM OLD FREIGHT CARS; A COGNITIVE WELL RINGS OUT FROM ITS STEEPLE. ITS PASTOR IS A RAILROAD SECTION HAND.

When the war called so many of the younger men from their home towns, a Massachusetts bank president took a night job in the roundhouse. He was so busy that he never had time to sleep. "I've now had a day's sleep in the freight house (and is still president of his bank)." —

EVERY HOUR OF THE DAY AND NIGHT, RAILROADS PAY OUT AN AVERAGE OF ALMOST A MILLION DOLLARS FOR WAGES, TAXES, MATERIALS AND SUPPLIES.

Bob Norton of the American Aberdeen-Angus Journal, was a Prince William County visitor this week. One of the purebred Aberdeen-Angus cows offered at the Piedmont livestock sales at Marshall last week was purchased by Montgomery Peters, Groveton.

## Trust Suit Called 'Threat'

The current anti-trust action against the Great Atlantic & Pacific Tea Company is a threat to the security of employees and to the living standards of consumers, John A. Hartford, company chairman, said recently in a personal letter to the firm's 110,000 workers.

Pointing out that the A&P "has never tried to get a monopoly, destroy competition, or restrain trade," Mr. Hartford said that the company's only objective was "to make our operation as efficient as possible so that we can give the people the most good food for their money."

Is Serious Threat  
"This attack," the letter said, "is a serious threat to our Company which you have all worked so hard and loyally to build. As such we must also admit that it is also a threat to your job and your future."

Since 1917 A&P has been managed by Mr. Hartford and his brother, George L. Hartford. The Company was started in 1859 by their father who opened the first store in downtown Manhattan. The firm rose to leadership in the nation's retail food business by selling quality food at low prices.

## State Enjoys Best Business This Year

RICHMOND.—Virginia enjoyed the best business in its history this year and its increase in travel and vacation revenue stands among the highest of any of the states, according to national surveys that have reached the Virginia Travel Council.

Virginia has a 13 per cent increase in foreign passenger car business on its highways, according to the State Highway Commission. The State Department of Conservation and Development credits the state with a 22 per cent jump in business and travel Council figures show that in only a few sections of the state has business failed to exceed that of the record year of 1948.

Almost 2,000,000 travel in year to and from United States.

## More Doctors To Entertain General Field

RICHMOND. — More physicians may be expected to enter the recently neglected field of general practice in the years ahead if the choice of the senior and freshman medical students of the Medical College of Virginia (Richmond) is any indication of a national trend.

A committee of the School of Medicine of the college interviewed each of its 92 senior medical students to aid them in the choice of a place to intern. It was discovered that 53.26 per cent of the physicians-to-be indicated an intention to enter general practice. In addition 3.26 per cent of the 92 students were debating between general practice and surgery and 1.09 per cent were undecided between general practice and obstetrics.

This reversed trend of medical students to be interested in entering general practice is also evident among the freshman medical students at the Medical College of Virginia. In a questionnaire survey to determine what phase of medical practice they expected to engage in when they finished their course, 48 mentioned general practice and 14 of these said they planned to go to a rural area.

## Forest Fire Danger Season Has Begun

Forest fire danger season for this fall starts after October 15, depending upon the amount of rainfall received, was stated by F. J. Tobst, district forester for 16 counties of the Piedmont section of Virginia. If the fall season is windy and dry there will be great danger of forest fires in the woods. The district forester stated that there are still too many forest fires that are started by careless campers, smokers and brush burners.

Foresters and chief forest wardens are training "Keep Virginia Green crews" to be ready for all forest fires during the fall season and local forest warden meetings are being held during the next 30 days.

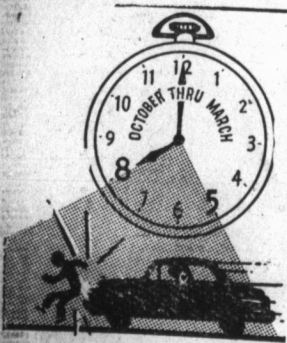

Tobst requested that fire-conscious persons inform others about the fire danger at this time of year.

Some of the rules for preventing forest fires are:

1. Be careful when smoking in the woods. (It is a good policy to stop walking if you must smoke in the woods.)
2. Be sure your cigarette or other lighted tobacco is out before discarding it.
3. Break your match after extinguishing it.
4. Be sure that your campfire is built in a safe place and that it is dead out before leaving it.

### PARTY LINE SAVES MAN

LE MARS, Ia.—A rural telephone party line is credited with saving the life of William Gronemeyer, 58-year-old farmer, who was buried by dirt and boards when the walls caved in while he was working at the bottom of a 34-foot well. His son sounded an alarm on the party line and within a few minutes several carloads of neighbors arrived and pulled him out unhurt.

Almost one-fourth of all pedestrian deaths occur during one-sixteenth of the year—between 5 and 8 P. M. in the six months of October through March.

## Vegetable Shortening Keeps Lard

Mixing home-rendered lard with vegetable shortening will make the lard keep fresh and sweet twice as long, says Miss Janet Cameron, extension services nutritionist at VPI. She reports that farm families who used this simple, effective means of preserving lard during the last two seasons found it highly satisfactory. With hog-butcher time just around the corner, she is recommending the method again.

**Ratio Is Three to 50**  
Only two or three pounds of the usual hydrogenated vegetable shortening are needed for each 50 pounds of lard. Add the shortening to the rendered lard in the kettle, just before settling and separating the cracklings. Another method is to mix the shortening with melted lard in the storage containers. In this case the shortening should be stirred carefully until entirely melted and mixed thoroughly with the lard.

Miss Cameron emphasizes that hydrogenated (hardened) vegetable shortening should be used. It is sold under various trade names and any good brand will do the job.

She advises storing home-rendered lard in tin containers, which should be free of rust. Since contact with air causes lard to spoil, containers should be filled to the top and closed tightly. After

### JOKE BACKFIRES

VEL CERRITO, Calif. — Peter Treadway, 14, showed his pal, Donald McDonald, that his gun wasn't loaded. However, while Peter's back was turned, young Donald slipped a bullet into the 22-caliber rifle. Then the practical joker gave the gun back to Peter and asked, "Is it loaded?" To demonstrate that it wasn't loaded, Peter pulled the trigger. The bullet tore through Donald's stomach. He was taken to a hospital in a serious condition.

If half of what the candidates say about each other were true the nation wouldn't last ten months after an election.
