

WHAT WE KNOW

Sometimes we wake up with a start to think we ain't so doggone smart as what we sometimes think we are. We know enough to take the car when July days have grown too hot for walking, and we mow our lot of its green whiskers' most as good as what a colored fellow could. We know how to dig a worm and put it on a hook to squirm its small cork-screw life away to lure a fish out of the bay. We know enough to go to rest when the red sun goes down the west, and enough to rise up at morn when the cool wind is in the corn, and enough to go day by day and make our little share of hay. We know the Hempstead melon beats all other various kinds of eats; so big, so cool, so fine, so green, so red inside, and sweet and clean, so wonderfully planned and made that one cool melon in the shade were worth a hundred trenches won at the hot muzzle of a gun. Those things are about all we know. We know not why the breezes blow, we know not why some mountains try with their cold peaks to pierce the sky, nor why some valleys are so deep, nor why the ocean surges sweep across the world to with a roar go all to pieces on the shore. We don't know why beef is so dear, we don't know where we go from here, we don't know why a fever hot is catching while good health is not; we don't know why in heaven above and here the sweetest thing is love; we only know it is, and that suits us where we are living at. We don't know, if love's best, what for the nations are blood-soaked in war, why man will seek his brother's goat, and claw and tear his brother's throat, and pray for strength to slay and slay until his foes have passed away. We know God's mercy is immense, and only mortals have no sense. —Houston Post.

WATER FOR COWS.

All animals require plenty of good, pure water. This is especially true of the milking cow, as water constitutes more than three-fourths of the volume of milk. The water supply, therefore, demands the dairyman's most careful attention. Stale or impure water is distasteful to the cow and she will not drink enough for maximum milk production. Such water may also carry disease germs which might make the milk unsafe for human consumption or be dangerous to the cow herself. During the winter, when cows are stabled the greater part of the time, and unless arrangements have been made to keep water before them all the time, they should be watered two or three times a day. If possible, the water should be 15 or 20 degrees above the freezing point, and should be supplied at practically the same temperature every day. When water well above freezing temperature is stored in tanks and piped direct to the cow, there is probably little occasion for facilities to warm it; but when it stands in a tank on which ice often forms, it usually pays well to warm it slightly. This can be done by a tank heater, by live steam, or by hot water from a boiler. If a boiler is used for running a separator or for heating water to wash and sterilize utensils, steam from it can readily and cheaply be used to warm the water. —Farmers' Bulletin 743.

PACKAGE WINS RECRUIT.

When Frank Sheehan, an express wagon driver, delivered a package at the United States Marine Corps recruiting station on South State street, he became a slacker for the express company and a marine for his government. The helper drove the wagon back to the barn. The package Sheehan delivered contained some new literature for the Marine Corps, and pictured the dashing sea soldiers bounding on the deeps, from the Spanish Main to the Orient—from China to the West Indies, with the added attraction of serving on land, at home and abroad. There was good pay in the argument, as well as free board, lodging, clothing, medical attendance, etc., and while the sergeant signed the receipt, Frank Sheehan looked and was lost, or found, just as you like, in keeping with individual views on preparedness.

DESTROYING THE BIRDS

Wars and rumors of war are on every side and occupy our minds a large part of the time. There is an ever-present fear of danger to our country. There is a real danger which is not considered as seriously or as frequently as it should be. There is in many localities a reckless destruction of bird life. "The hawk has caught a chicken," is the cry. The hawk must be shot. The owl shares his fate. This is without thought of the thousands of moths and injurious insects which they have destroyed, thus enabling you to enjoy some of the fruits you have been endeavoring to raise. Had these birds not helped you by killing insects you would have no fruit at all. The North American calls attention to the fact that "one pair of cypsy moths, unchecked, would in eight years produce a brood that would destroy every vestige of foliage in the United States." What is the value of one fowl compared with the thousands of injurious insects destroyed? These birds also relieve you of an army of mice that are destructive. Many other birds are good friends of man, clearing trees from scale and various injurious things that, unaided, he would be unable to cope with. Instead of killing every hawk or owl you see, study about the birds and discover which among them are your friends. Few birds deserve death at your hand. Without the birds man could scarcely live at all, and if existing, would be deprived of almost every comfort and pleasure.

Auto for Every 44 Persons.

Motor vehicles average one registration for every 44 persons in the United States in the last year, according to the office of public roads, Department of Agriculture.

The total number registered in the United States, last year, was 2,445,664, for which registration and license fees aggregated \$18,000,000.

WOOD'S Descriptive Fall Seed Catalog

Just issued, tells all about Crimson Clover, Alfalfa and all Grass and Clover Seeds for Fall Planting. Wood's Fall Seed Catalog also gives full and complete information about Vegetable Seeds that can be planted to advantage and profit in the late Summer and Fall. It is also the most useful and valuable Fall Seed Catalog issued. Mailed free to Gardeners, Market Growers and Farmers on request. Write for it. T. W. WOOD & SONS, SEEDSMEN, - Richmond, Va.

FEELS GLAD TO RECOMMEND TANLAC

Norfolk Man Suffered From Acute Indigestion, But Now All Symptoms Are Gone.

"I suffered from acute indigestion and catarrh, had been treated at hospital, but still not able to work, couldn't sleep at night and pain was severe from indigestion," said Wilma Umphlett, whose address is R. F. D. No. 3, Norfolk, Va.

After reading testimonials in the paper of Tanlac's wonderful work in relieving suffering of people troubled with stomach, kidney and liver ailments, he gave Tanlac a trial and the following is what he has to say: "My relief through the use of Tanlac was as follows: I am now at work, all symptoms of indigestion have gone, can eat what I like, food digests well, rest good at night, it did me good and feel that others can have same results. I feel glad to recommend Tanlac."

If you are a sufferer from stomach, kidney or liver ailments surely you should give Tanlac a trial. It can be secured here at Dowell's Pharmacy, Manassas, Va. Adv.

It will be worth your while to inspect our stock.

F. A. Cockrell & Co. Manassas, Va.

FARMERS TAKE NOTICE

The way to make two blades of grass grow where one does now: Buy the celebrated Magnesium Lime from Leesburg Lime Co., the lime that has been sold in Loudoun and Fairfax for the past twenty-five years, and out-produced them all, and the reason for it is because it contains Magnesium and Oxide of Iron in right proportion to Calcium Carbonate, and the United States Agricultural Department in Year Book 1901, page 161, states that Magnesium is absolutely necessary to plant growth and nothing else will take its place. Send orders to Cornwell Supply Co., Manassas, Va.; A. S. Robertson, Wellington, Va.; M. Rollins, Bristow, Va., or direct to us and same will have prompt attention.

Leesburg Lime Co., Inc. B. V. WHITE, Manager

MANASSAS, VA., FRIDAY, AUGUST 25, 1916.

RAILROAD RAILS AND SIGNALS

A consulting engineer of the New York Central railway has perfected, it is reported, a process whereby hidden defects in steel rails may be cured, so that the danger of rail breaks may be practically eliminated. He has been working on this problem for a long time in a laboratory car that has been virtually his home for thirty-two years. His process consists in a reheating of the finished rail, followed by a special treatment. The importance of this discovery, assuming that it is genuine, is shown by the fact that in 1915 broken rails caused 3,045 accidents in this country, the death of 205 persons, the injury of 7,341 and the loss of property worth nearly \$4,000,000. The ratio of rail breaks on the New York Central lines heretofore has averaged about 1 to 600 rails. Since this new process rail has been installed the breaks have been reduced to 1 in 142,000 rails.

Much comfort is to be gained by the traveling public from this announcement, unless the reduction of the danger of rail breaks is followed by an increase in the speed, which would in all likelihood offset whatever gain the new rail affords. Railroad safety, moreover, will not be assured until the transportation lines adopt automatic cab signals and stops, whereby the careless or inattentive or risky engineer and the error-making signalman may be checked and rear-end collisions prevented. If the railroads had devoted as much time to the development of a trustworthy cab-signal system as the New York Central has to the evolution of the dependable rail the risks to which the public is exposed would today be reduced greatly.—Washington Star.

EUROPE'S JUNK AFTER WAR

Has any one thought of the magnitude of the junk business in Europe after the war? There have been squibs and comic drawings about it, but how much serious consideration has it received? Last year in these United States of America \$140,000,000 was paid for scrap iron. This is a big and wasteful country, but it cannot be using up metal at more than a fraction of the rate prevailing in the war zone. Thousands of tons of iron, not to mention copper, brass and lead, have been shot away at each of many narrow strips of the battle line. The top soil in the salient of Ypres, on the line north of Arras, on the Somme front, and, above all, at Verdun must be so saturated with metal as to be a sort of artificial ore. Surely, in the bitter poverty which will be Europe's portion when she is through with war lords, that resource will not be forgotten. For that matter, it may be that Europe's workers will turn thrones and crowns into "scrap" too.—Chicago Journal.

HERE'S TO LAUGHTER!

Here's to laughter, the sunshine of the soul, the happiness of the heart, the heaven of youth, the privilege of purity, the echo of innocence, the treasure of the humble, the wealth of the poor, the bead of the cup of pleasure, it dispels dejection, banishes blues and mangles melancholy, for it's the foe of woe, the destroyer of depression, the enemy of grief; it is what makes kings envy peasants, plutocrats envy the poor, the guilty envy the innocent; it's the sheen on the silver of smiles, the ripple on the water's delight, the glint of the gold of gladness; without it humor would be dumb, wit would wither, dimples would disappear and smiles would shrivel, for it's a glow of a clean conscience, the voice of a pure soul, the birth-cry of mirth, the swan-song of sadness.—New York Herald.

RE-ENLISTING

Real soldiers of the National Guard now on the border are re-enlisting to show their devotion to their country's cause. This is the best sort of answer to some of the criticisms that have been made.—Richmond Times-Dispatch.

If President Wilson succeeds in averting the labor war, the temptation will be powerful strong to call on him to try his hand on the European war.—Raleigh News and Observer.

"Thank God, nobody owns the progressive party today," exclaims Candidate Parker. Well! —The Leavenworth Times.

THE MYSTERY OF INFANTILE PARALYSIS

No wonder sanitarians frankly admitted themselves puzzled, though not baffled, when they met in Washington to confer on the spread of infantile paralysis.

The disease will appear in a neighborhood, claim one victim and give no evidence of being communicable. A year, two years, even longer may elapse, and then, when the disease recurs, it will seem to be highly contagious.

Several children may be living together in the same household; one may be taken, the others passed over. The next case may be some distance away.

Many adults are manifestly immune, but when one contracts infantile paralysis, the course of the disease is rapid and its symptoms severe.

The plague may rage in private homes, even where the sanitation is excellent, but may, at the same time, pass over institutions where children are herded together.

In one community the disease may be mild; in another of apparently the same sanitation, it may be very fatal.

In rural districts, some claim, the mortality is higher than in the cities.

And so contradictions appear until the shrewdest epidemiologist finds himself thus far working in a circle, with no tangible line of connection between the cases. Meantime, all efforts to identify the micro-organism—if there be one—have proved futile and one theory seems about as good as another.

The only parallel in preventive medicine is a somewhat allied and likewise mysterious disease, cerebro-spinal meningitis. Sanitarians are satisfied that this malady appears in two forms, one communicable and the other not. They suspect and have almost proved that the germ may be carried by persons who have no symptoms of the malady. Yet they have never discovered under what conditions the non-communicable form of the disease is transformed into the communicable, or whether the process of infection for the two forms is different. Reasoning from the little that is known of cerebro-spinal meningitis to the less that is known about infantile paralysis, most authorities believe that the disease must be one to which most people have an immunity—a disease that is spread by immune carriers even more than by contact with those suffering from its active symptoms. It may well be, as in the case of some other communicable diseases, that the acutely-infectious period of any case comes before the symptoms have asserted themselves. Finally, there must be a seasonal or climatic factor as yet little understood, just as typhoid has been shown to be more prevalent in very hot or very wet summers.

American scientists have met and solved problems almost as difficult as this. They have never identified the organism that causes yellow fever, but they have found the method of its transmission; and both in the jungles of Panama and the crowded streets of New Orleans they have demonstrated beyond the carping of critics the correctness of their findings. They have shown that typhus is spread by lice and that the germ of plague is carried by fleas. More recently they have investigated pellagra and, working only from the symptoms, they have traced back this "Lombardy leprosy" to bad diet. In no instance did these great discoveries come quickly. Little by little, careful findings had to be correlated and reasoned. It is hardly probable that it will be otherwise in handling infantile paralysis; but neither is it probable that science will fail where it has so often succeeded. It is enough to tear the heart of a lover of children to think of thousand of little ones doomed to be cripples for life. Nothing that can relieve their suffering or limit the spread of the plague must be left undone. But in doing these things, we wait hopefully on the findings of investigators, confident that in the Providence of God, we shall never have another epidemic as horrible as this.—Richmond News Leader.

More than a generation ago it was Oliver Wendell Holmes who saved the famous old frigate by an outburst of inspired balladry which forced Government red-tape to preserve the ancient relic intact. Now it is some New York millionaires who quietly come to the rescue of the first submarine Holland and save it from the junk-dealer's unsentimental hand. The method of salvage is characteristically different from what it was years ago. Then no Yankee would have paid hard cash for what could be saved by expenditure of enthusiasm and brain. We were more home-spun then. And though the Constitution has never done anybody any good since Holmes went to her rescue, his poem has thrilled the hearts of thousands of school children. The nation is richer by an undying ballad. The purchase of the Holland leaves us poorer in coin, and no richer in heart. Where is the American poet of today who could fitly celebrate the scrapping of this landmark submarine? The occasion is no less momentous or soul-moving than that which greeted Holmes, but the echoes are silent.—New York Post.

CONNER BUILDING

MANASSAS, VIRGINIA

Mr. James F. Gulick, of Washington, a former resident, is visiting friends in Manassas.

Miss Eleanor Saffer, of Annapolis, Md., is visiting her parents, Mr. and Mrs. F. E. Saffer.

Mr. and Mrs. A. L. Emmons, of Ohio, last week visited at the home of Mr. C. J. Meetze.

Miss Mattie Weir is the guest of Miss Myrtle Grenela, at her home in Middlesex county.

Mr. James Payne, of Nokesville, visited his mother-in-law, Mrs. S. E. Simpson, Monday.

Lieut. West, of the Seventh New York, is a guest at the home of Mr. and Mrs. P. H. Lynch.

Miss Evelyn Milnes recently was the guest of her sister, Mrs. R. Hilton Evans, in Baltimore.

Miss T. P. Waters and Mrs. O. D. Waters are spending the week in Baltimore and Philadelphia.

Rev. J. F. Burks, rector of Trinity Episcopal Church, has been visiting in Culpeper county.

Prof. B. K. Watson, agricultural director of Manassas High School, is visiting at Weir, Miss.

Mr. Eldredge Simpson, of Clifton, visited his aunt and uncle, Mr. and Mrs. S. E. Simpson, Sunday.

Mrs. Hervis U. Roop and Miss Margaret Roop have returned from an extended stay in Atlantic City.

Misses Sattle and Catherine Larkin are guests of Mr. and Mrs. W. P. Rudasill, near Culpeper.

Misses Annie and Helen Elgin, of Clifton Station, were week-end guests of Mr. and Mrs. D. J. Arrington.

Mrs. A. J. Adams and Miss Murray Adams, of Washington, have been guests of Mr. and Mrs. W. P. Larkin.

Mrs. Joseph S. Boorman and Miss Alice Boorman, of Washington, are guests of Mr. and Mrs. D. H. Prescott.

Mr. Hubert Smith, of Birmingham, Ala., is the guest of his sisters, Miss Annette Smith and Miss Magie Smith.

Mr. Aylett Holtzman, of Washington, this week has been a guest at the home of Rev. and Mrs. T. D. D. Clark.

Miss Ruth Round has returned from New York where she attended the summer session of Columbia University.

Mr. Claude C. Cushing, of Upperville, recently visited his mother, Mrs. S. C. Richards, and his sister, Mrs. I. M. Donohoe.

Miss Isabel Kelley leaves tomorrow to spend several days with her brother, Rev. Alford Kelley, at Takoma Park, D. C.

Miss Eula Shryock, who has been visiting Miss Maude Hall and friends at Front Royal, leaves for her home in Ohio tomorrow.

Miss Daisy Marie Pote left Sunday for her home at Clarion, Pa., after a six weeks' visit to her grandmother, Mrs. Barbara Pote.

Mr. William K. Carr, of Charlotte, N. C., a student of Trinity College, Durham, N. C., is spending several weeks in Manassas.

Miss Helen Norman and Eugene Norman, of Baltimore, are visiting at the home of Mr. and Mrs. James F. Dinkett, near Manassas.

Mr. and Mrs. T. Ramsay Taylor and little Miss Irvine Taylor, of Norfolk, are the guests of Mr. Taylor's mother, Mrs. T. O. Taylor.

Col. and Mrs. H. L. Willis and their daughters, Misses Helen and Laura Willis, left Wednesday to make their home in Washington.

Mr. Thomas E. Hume, of Washington, spent the week-end at the home of his brother-in-law and sister, Mr. and Mrs. T. J. Broadus.

Messrs. G. M. Ratcliffe, L. E. Merchant and R. A. Waters and son, of Dumfries, came to Manassas today in Mr. Ratcliffe's automobile.

Mr. Malcolm S. Kelley, of Harrisburg, Pa., is spending the week here as the guest of his sister, Miss Isabel Kelley, at the Manse.

Mr. and Mrs. Roy R. Pote and their little daughter Ethel, of Washington, spent Tuesday with Mr. Pote's mother, Mrs. Barbara Pote, near town.

Mr. W. J. Walker returned today, after spending several days at the home of his son-in-law and daughter, Mr. and Mrs. T. Noel, at Alexandria.

Mr. George Bell and Mrs. J. I. Randall have gone to visit Miss Anna Bell at a Baltimore hospital.

Mr. W. N. Lipscomb, Miss Mary H. Lipscomb, Miss Theo Brown and Miss Mary Beverley Leachman attended the horse show at Warrenton yesterday.

Mrs. Albert Speiden, Miss Virginia Nelson Speiden and Master Edwin Nelson Speiden are the guests of Mayor and Mrs. Austin O. Weedon, at Warrenton.

Col. and Mrs. Robert A. Hutchison and little Misses Ruth and Elizabeth Hutchison have returned from an automobile tour through the southeastern part of the state.

Misses Julia Lewis, Bessie Walker, Bert Davis and Nettie Lohr and Dr. J. M. Lewis and Mr. W. Fred Dowell spent Sunday at Occoquan, making the trip by automobile.

Mr. and Mrs. James R. Larkin had as their guests for the week-end Mrs. John Cooke Brooke and little Miss Millian Carter Brooke, of Hyattsville, Md., and Mrs. M. A. Johnson, of Baltimore.

Mr. and Mrs. Arthur W. Sinclair, Mr. C. A. Sinclair and Mrs. E. B. Giddings and their young daughters, Misses Eloise and Mary Giddings, have returned from a stay at Atlantic City.

Mr. and Mrs. Ernest Kelley and four children, of Warrenton; Mr. Crawford, of Philadelphia, and Mr. Francis Turner, of Aldie, have been guests of Mr. and Mrs. B. F. Adams during the week.

Mr. Earl Warfield, of Washington, spent Sunday with his family, who are stopping at the home of Mrs. J. W. Prescott. Mrs. Virginia Manuel, Mrs. Warfield's mother, is with her daughter at present.

Mrs. Bayard Sheldon leaves next week to visit relatives in New Jersey. Mrs. Sheldon will be accompanied home by her little daughter, Miss Dorothy Sheldon, who has been in New Jersey for several weeks.

Mrs. S. T. Hall returned Saturday after a three weeks' visit to relatives in Culpeper county. She was accompanied home by her brother, Mr. Gideon McDonald, who spent a few days here with Mrs. Hall and her sister, Mrs. Rosenberger.

Mrs. Wellington Rosenberger and daughter, of Williamamantic, Conn., who have been the guests of Mrs. Rosenberger's mother-in-law, Mrs. G. W. Rosenberger, left Wednesday to visit in West Virginia, before going to their new home in Colorado.

Mr. and Mrs. George, accompanied by their three children and Mrs. George's parents, all of Herndon, and Mr. and Mrs. Sheen and their two children, of Bristol, Tenn., were guests of Prof. and Mrs. B. T. Hodge, Sunday. The visitors came from Herndon by automobile.

Mr. and Mrs. J. N. Gibbs, of Mount Vernon, are spending several weeks with Mrs. J. W. Prescott. Mr. Gibbs' sister, Mrs. R. R. Ballinger, and Miss Mary A. Gibbs spent Friday night as his guests. Mrs. Ballinger was much interested to discover that on the beautiful grounds surrounding Mrs. Prescott's home, was located the boarding school she had attended just prior to the Civil War.

Mr. and Mrs. W. N. Lipscomb and their daughter, Miss Mary Henrietta Lipscomb, accompanied by their guest, Mrs. Charles E. Lipscomb, have returned from a ten days' stay at Atlantic City. The trip of about 700 miles was made in Mr. Lipscomb's car without accident. They were joined at Atlantic City by Mr. Charles E. Lipscomb and Mr. W. Harold Lipscomb, of New York City.

Such tobacco enjoyment as you never thought could be yours to command quick as you buy some Prince Albert and fire-up a pipe or a home-made cigarette! Prince Albert gives you every tobacco satisfaction your smoke-appetite ever hankered for. That's because it's made by a patented process that cuts out bite and parch! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

PRINCE ALBERT the national joy smoke has a flavor as different as it is delightful. You never tasted the like of it! And that isn't strange, either. Men who think they can't smoke a pipe or roll a cigarette can smoke and will smoke if they use Prince Albert. And smokers who have not yet given P. A. a try-out certainly have a big surprise and a lot of enjoyment coming their way as soon as they invest in a supply. Prince Albert tobacco will tell its own story! R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

Kann's—Second Floor

FARMERS

Look at the Price of Wheat

See how all the fertilizers have advanced, though now they have very little potash in them. You know how essential potash is to your crops. Don't despair—there is plenty of potash in your soil, if you can only make it available. The one and only way is to use LIME. You can't afford to farm any longer without LIME. You know it costs just as much to raise 10 bushels of wheat as 20; or 5 barrels of corn as 10. If you want to double your crops, wake up—get busy and LIME FREELY. The LIME that has been used for the past 30 years with best results is the LIME for you and that is, of course,

THE CELEBRATED LEESBURG LIME

Because it contains 10 to 15 per cent magnesia. The U. S. Department of Agriculture states in the Year Book for 1901, on page 164, that magnesia in combination with lime is absolutely necessary for plant growth, and there is nothing that will take its place. What better authority have we than this? Only one—that is actual results—and of these we can give you ample proof, backed by hundreds of testimonials from the best farmers of both Loudoun and Fairfax counties.

Don't Lose Any More Time—Place Your Orders at Once With

The Cornwell Supply Co., Manassas, Va.; A. S. Robertson, Wellington, Va., or M. A. Rollins, Bristow, Va., and be sure of getting the very best lime to be had, as well as prompt and courteous attention.

31 1/2 Horsepower New Series Overland Model 75 B \$635 Roadster \$620

Why Don't You Get a Car?

Stop putting it off. Don't hold to the old fashioned idea that an automobile is an expense. It is not. It's an economy.

Take this splendid new Overland, for instance. It costs only \$635. It's a beauty. Large enough for your whole family; easy to run; your son and daughter can do it; has a big, power-

ful 31 1/2 horsepower motor and is as complete as the most expensive cars in the world.

Also it uses very little gasoline.

Bring your family in today and see this Overland. It's the greatest value of the year.

THE TEST OF LEISURE.

In reply to the question, "What is a woman of leisure?" a speaker at a woman's conference amused her audience by giving some definitions that she had gathered at a luncheon a short time before. Here are some of the answers she received:

"A woman of leisure is any woman who hasn't five children."

"A woman who has time to play bridge daytimes."

"There is none; she is extinct, like the dodo."

"The woman who has time to be always telling you how busy she is."

"The woman who is on ten boards, and equally useless on all."

"The only one I know is bed-ridden."

"The busiest woman in town, who always finds time to do one thing more, and do it graciously."

It may be that the woman of leisure has not even the scientific security that belongs to the dodo, which, the dictionary assures us, is but "recently extinct." Research into the history of woman through the ages may, indeed, show that the woman of leisure never was; that she is only a myth—haunting, wistful, alluring.

To a daughter who asked what is leisure, a mother answered, "It is the spare time that a woman has, my dear, in which she does something else."

That "something else" has to be dealt with in nearly every life. What is the one thing more that, by hook or by crook, each of us manages to crowd upon the margin of our programmes? The latest play or novel or crochet stitch? The latest "ism" of philosophy or art or religion? The newest experiment in civics or education? Or is it by chance a little space for friendly, old-time hospitality, for study undertaken for the sheer joy of learning, for neighborliness, for home times with your own family? Is it not possible, indeed, that these things are the real business of life, and the fads but the occasional "something else?"—The Youth's Companion.

HIS MOTHER CAME FIRST

While the mobilization of a certain Illinois regiment was under way women in the persons of relatives and friends of the guardsmen flocked to the camp in such numbers that necessary work was hampered. Thereupon, it is reported, the colonel issued orders that only one woman be allowed to visit each member of the regiment.

One of the guardsmen, not yet knowing of the order, approached the camp in company with his mother, a sister and his fiancée. The guard stopped the party and sternly asked who the women were. When told he answered: "You can take in only one. It's up to you to choose."

The young man looked for a moment at the three and then said, "Mother."

When war is in the air humanity gets down to fundamentals, and when this is done mother will never get the worst of it.

We do not believe that the young guardsmen will make a worse husband than if he had chosen his sweetheart. A man who can appreciate his mother may be expected to take good care of his wife.—Ex.

Warm Weather and Meat

With summer soon here you can not be too careful about the kind of meat you buy. Unless properly cared for meat soon becomes tainted in warm weather and tainted meat is just so much poison to you. Buy only meat that is fresh and properly cared for. We make special effort to handle our meat properly from the moment the animal is killed until the steak, chops and cut leave our market. We have a fine ice box and we keep down the flies. Order your meat from us just before you wish to cook it and you will get good meat even in the hottest weather.
