The enormous demand and output of the FORD factories have enabled them to run their plants on full time in both sum: mer and winter while others are shut down, thus enabling them to retain as a unit their especially trained force of skilled labor from year to year, to reduce their overhead expenses to a minimum and make

Sweeping Cut in Prices for 1912 Models

ing on earth, entitled to the name of automobile, can meet the price—\$590, for a 4-cylinder 3\(\frac{1}{2}\)x4', water and fan cooled, 20 h. p., multiple disc clutch motor on an all steel chassis, with 30 inch wheels, fully equipped, which means with top, hood, windshield, speedometer, searchlights, rear and side oil lights, oiler and kit of tools.

The little machine needs no recommendation and we have naught to say other than it the "wisdom of the wise" and the fact that they are as thick as ants in the streets of this and every other country of the civilized world is worth anything at all it is sufficient endorsement of the Ford cars' merit, as there are three Fords in use to one of any other

The 1912, 100-inch wheel-base Ford is a wonderful 20-horse power machine of Vanadium steel construction, weighing about 1,-200 pounds, with many important improvements and refinements, is "fool proof," has no expensive batteries, generates its own electric light any 8-year-old child can drive it and it will go anywhere in any kind of company with speed to eneme; but while it with speed to spare; but while it is being used daily in the roughest kind of work, we especially recommend it as a light Roadster, being ideal for doctors, mail carriers riers, contractors and general business purposes, seating one or three passengers or trunk and two passengers.

For heavy duty or family machines we strongly recommend the E-M-F-30 or Studebaker line. There is nothing on earth more dependable for 5 or 7-passenger duty at any price and but few as good or handsome. Price, \$1,185 complete.

CLYDE MILL

This well known milling institution, situated on Broad Run, near the residence of Mr. John Hall, has been rebuilt and set in first-class order. It is being operated by Mr. J. A. Rapp, a miller of many years' experience. Flour, Meal and Mill-feed, such as Bran and Middlings, are manufactured and kept in stock. The Flour is a straight grade, made from the very best wheat of a rich cast and guaranteed oure and healthy. The Meal is ground on four-foot new stone, a perfect condition and is,

heating.
Mr. Chas E. Hall is also at the mill and will be glad to extend any courtesies to cuswill receive prompt attention. Best market prices paid for

L. C. Smith & Bros. Typewriter (Ball-Bearing, Long-Wearing)

Before selecting a typewriter, you owe it to your interests to inspect this new model. It is the latest example and highest product of the typewriter manufacturer's skill, and of our continuous policy of "something still better."

The new Model Five includes every practical device and convenience the operator can require all inbuilt as integral parts of the machine itself

You will be delighted with its compact completeness. The ball bearings throughout permit adjustments close enough—while still perfectly free-running—to eliminate all play and mechanical rattle. An increased volume of work at least effort is assured by the light, smooth touch and snappy action, which DOES NOT TIRE THE OPERATOR'S FINGERS.

Even though "hard to suit" this newest model cannot fail to impress you. For the work you want of a typewriter it is without an equal.

spanapapapapapa

You should read our "Story of the Ball Bearings," which explains just why the L. C. Smith & Bros. Typewriter is the high-efficiency writing machine. Write
