Little Capitalists

• Every child who has a savings account with this bank is a little capitalist:

¶ And is cultivating habits of thought and action through which fortune is won.

This bank encourages children's accounts. Many "grown ups" with substantial balances began saving here when they were young and the bank was young.

Tevery child in Prince William county can. be a little capitalist at this bank.

Call in and let us explain our new method of starting the little ones right.

RABIES IN 1911

In 1909 the Public Health and

Marine-Hospital Service insti-

frequency of rabies in the United States during the year 1908. All

were utilized and complete veri-

fication of the cases was at

tempted in every instance. A

comparison with the figures ob-

possible sources of information

tuted an investigation as to the

tained in 1911 would indicate that the infection is on the increase.

In 1911, cases were reported from 1,381 localities as against 534 in nored by the duchess, at last 1,581 localities as against 534 in determined to send her little girl, 1908, while there were only 98 determined to send her little girl, deaths in 1911, notwithstanding a pretty child of ten years, for the largely increased number of needed. localities from which the disease was reported, as compared with 111 deaths in 1908. This is accounted for probably by the large increase in the number of instilocalities from which the disease tutions in which the antirabic was ushered into the presence of treatment could be obtained and her grace, the little girl dropped by the fact that the victims her grace, the little girl dropped her a bow of courtesy, and then, of this treatment. In 1908 there were 23 institutions in the country was a substitution of the country were 23 institutions in the country was a substitution of the country were 23 institutions in the country was a substitution of the country was a try where this treatment was may the Lord make me truly administered; in 1911 there were thankful." administered; in 1911 there were at least 42. In addition there are a number of laboratories which supply material for inoculations to practicing physicians. The number of persons known out a check for the amount due to have taken the treatment in he milliner. 1908 was about 1.500, while in 1911 it was 4.625. The figures for 1911 show that the period of cer brought a Chinese servant incubation in 19 out of 65 cases named Quong home with him was between 21 and 30 days, this from the Far East. One day being the largest number for any the Oriental asked permission to given incubation period. Three attend a funeral, cases occurred over 12 months "Go shead Quong. after the injury. The average the officer. Then he supple incubation period of all cases, mented, "I suppose you will place excluding those over one year, different kinds of food on your was 49.25 days. The decrease in dead friend's grave, as they do the number of deaths in 1911 as in your native country." compared with 1908 amounted to Sames as in China," said nearly 12 per cent. Striking facts Queng. brought out in this report are the wider distribution of the infecofficer, good-naturedly, "when
