FRANK E. GARRISON, Mai

MANASSAS, VA., THURSDAY, AUG. 21, 1913.

### MAINLY TAX LAWS

The legislative committe of the Farmer's Institute of Northern Virginia, that was appointed last winter, made its report at the institute held in the pavilion at Groverton last Saturday. It is in the form of a set of requests to the legislature for needed changes sensible, progressive document. Its main fault being its brevity, which is a fault more easily corrected than some others might be, success marriage will have to have Cupid's O. K. The first paragraph calls for a County Board of Equalization consisting of the Clerk of Court, Treasurer and Chairman of the Board of Supervisors and a state board composed of the State Auditor, State Treasurer and one other state official not named. This is a most important matter, discussed at length several times in these columns, and we do not see how the legislature can overlook and still look its constituents in the eye. The committee should have gone a little farther along this line and suggested a regular system

of percentage assessments based on the laws of necessity and siec ulation as suggested by THE DEMOCRAT in its issue of March 6th, 1913. This system aimplifies the work of the assessor and the she is going, but she is in a position to realize that she is on her Board of Equalization and puts the whole matter in such shape way that everyone can understand it.

hands of the District School Boards, we also consider very impor- State. present system and think it must have been an oversight by the when the trial comes, tiger skin cannot be made to look like erthe proposed change. The purpose of a School Board is to build un and conduct a system of schools adequate for the district's needs and how it is possible for them to do this when the main spring of their existence, vis: funds, in the hands of a man totally uninterested in schools is a problem too difficult for us. We know of many districts in the state that are struggling under just this state of didn't like to say anything about it. affairs. The committee's recommendation that the School Board be made elective is, we believe, open to argument. We are on the fence, knowing that either system is often justly criticized, but we are informed that in order to be able to levy the tax the Board must be made elective.

On paragraph 7, regarding dogs, volumes might be written and not all the facts brought to light then. It is, however, a fact the dogs should be kept as closely as are cattle. They do as much damage besides spreading fleas and bring menace to health and

### GETTING CHURCHES TOGETHER

has for its purpose the reduction of the ratio of churches to population, the union of congregations and the cessation of what amounts to competition among the Protestant sects. Leaders of the movement credit all sorts of woes to the multi-

plication of denominations and church edifices. It is held responsi ble for the notoriously low salaries which clergymen draw charged with the duplication of charitable works, the expenditures of money and energy to keep up church property which might be spent to better advantage elsewhere, the intensification of wasteful prejudices and petty jealousies. Mr. Everett T. Tomlingon, in the August "World's Work." recites the fact that in one county is Kentucky, of a total church population of 5.997, there are sixty cight Protestant churches. "The average membership is less than or less. The average church budget is \$328 and the average wage paid by a church to the minister is 2222.

Mr. Tominson thinks that the trouble lies 'in the spirit dependence and religious liberty particularly manifested two three generations ago." The extreme individualism, which distinneedlessly into being would also give way before the new ideas of damage to the crops, enormous as it is, has become a secondary

### NEW YORK FOR THRILLS

scandals New York City and State have got all other localities wiped off the map. The Nation hardly had time to draw a clean breath that haystacks are being set aftre by the heat, while animals and after the horrible murders, graft and imprisonment of the recent molice exposures in the city when it is scandalized by the impeachment of Governor Sulzer. About two-thirds of the blame for these o strages is due to that extremely well organized and perfectly unacrupulous body known as Tammany Hall. We had a great deal of emfidence in Governor Sulser and, although the confession of his wife has weakened his case very materially, we still think the is far from being as crooked as Tammany is trying to make him that if he did use some of the campaign fund for his personal use it is, in the first place, only the outcome or r of a totally wrong system of ecuducting politics, and in the second place, he is probably not one fourth as guilty as a great many of he not only must have a clean record but he must be prepared to being sent back to New York, and the asylum, where for the
