

Virginia Department of Historic Resources Site Survey
76-331, Florence/Barnes House, 1981
76-319 View of Front

The Virginia Department of Transportation's schedule for demolition has been put on hold due to the reassessment of the State budget. Public Works Transportation is monitoring this situation. The Historical Commission will need to seek funding from the Board of County Supervisors to relocate this house. The report to the Board should include a proposed receiving site. We have asked the Park Authority staff if they had any recommendations on a receiving site.
